The Federal Aviation Administration's Information Resources Management Plan ((IRMP)), Systems Plan, FY89 - FY93, documents the steps that are being taken to achieve the agency's long-term information resources management ((IRM)) goals. In the past, IRM goals were documented in the IRMP, Volume I: Strategic Overview; however, a revised/updated strategic overview is not being published this year. Current plans call for initiating the development of a new strategic plan during FY-90.

This systems plan focuses on a 5-year planning horizon and includes funding requirements for specific projects for each of the 5 years ((FY89 - FY93)). The project summaries and ongoing systems fact sheets reflect the status of the IRMP planning data base as of October 1989. All of the projects contained in this document have been reviewed and approved by the agency's top management officials.

This plan represents not only our commitment to new IRM efforts for improved operations, but also our commitment to continue support of ongoing systems. These projects and systems will provide significant benefits to our agency, including better access to information for decisionmaking and management of agency resources.

Brooks C. Goldman  
Senior Management Official  
for Information Resources Management

# 1 .0 INTRODUCTION

**As** one of the operating administrations within the U.S. Department of Transportation (DOT), the Federal Aviation Administration (FAA) provides a wide variety of services which are essential to the safety, performance, and economy of aviation. To match the growth of the air transport industry and to take advantage of advancing technologies, the FAA continues to update the National Airspace System (NAS).

In addition to managing air traffic, however, the FAA is also the primary source of many kinds of information and services which are vital to the aviation industry. Aircraft and airport standards and certifications, aviation regulations, pilot examinations and certifications, and aviation statistics are a few examples of services which are knowledge-based and call for extensive information processing and communications. Furthermore, the agency manages the logistics and personnel necessary to support the NAS, as well as fulfill its regulatory and service responsibilities. To perform these missions efficiently and effectively requires the same quality of internal management information as is needed in any well-run business organization.

The Information Resources Management (IRM) program of the FAA was established in 1983 principally to meet the requirements of the Paperwork Reduction Act, and to serve as the focal point for IRM planning, policy development, program coordination and direction, and technical assistance within the agency. Since 1983, the agency's IRM program has continued to grow in scope of responsibility and importance to keep pace with increased levels of automation and complexity throughout FAA. The IRM program includes upgrading, coordinating, and integrating all of the major information systems which are not included in the real-time systems used for managing the National Airspace System. The IRM program recognizes that FAA's informational resources (people, hardware, software, and procedures) need to be carefully utilized, and that the management of these resources is critical to achieving efficient operations throughout the agency.

## BACKGROUND

The FAA IRM planning process provides management the opportunity to:

- Obtain active participation from all levels of management within the agency in identifying and reviewing myriad program needs and opportunities to improve agency operations through the application of information and systems technology;
- Choose future directions and alternative management strategies in achieving agency objectives;

---

[1] Title 44 of the United States Code, Sections 3504(g) and 3505(3)(B); Public Law (P.L. 96-511), the Paperwork Reduction Act of 1980; and, the Paperwork Reduction Reauthorization Act of 1986.

- Review information systems priorities to ensure conformance with ongoing agency mission priorities and activities;
- Look beyond immediate actions to evaluate IRM-related long-term costs and benefits;
- Permit FAA to meet all applicable requirements of the Paperwork Reduction Act; and,
- Engage in discussions with the Congress, the General Accounting Office, the Office of Management and Budget, General Services Administration, and other oversight organizations so as to more fully and thoroughly comply with external rules, regulations, and policies.

The Information Resources Management Plan (IRMP) is based on a simplified, information-based planning process aimed at broad participation and timely, constructive action. It presents the agency's strategy in the following specific information areas:

1. Airports Information Requirements
2. Air Traffic Control (ATC) and Airspace Information Requirements
3. Aviation Activity Information Requirements
4. Aviation Safety Analysis System (**ASAS**) Information Requirements
5. Financial Resources Information Requirements
6. Human Resources Information Requirements
7. Materiel Resources Information Requirements
8. National Airspace System (NAS) Facilities Information Requirements
9. Office Automation and Management Support Information Requirements
10. Information Processing and Support Information Requirements
11. Human Interface and Training Information Requirements

The objectives of this Systems Plan are to:

- Improve top management's awareness of IRM projects;
- Coordinate IRM planning with the budget process, and increase user participation in the planning process;
- Act as a catalyst to promote clearer definition of IRM policies within FAA, Order **1370.52C**, *Information Resources Management — Policies and Procedures*;
- Avoid duplication of effort by program offices by encouraging the sharing of resources, where appropriate; and,
- Provide a working document to be used by management to monitor the administration of the agency's IRM program

## **FAA ORGANIZATION**

The Federal Aviation Administration (formerly the Federal Aviation Agency) was established by the Federal Aviation Act of 1958. It became a component

- Review information systems priorities to ensure conformance with ongoing agency mission priorities and activities;
- Look beyond immediate actions to evaluate IRM-related long-term costs and benefits;
- Permit FAA to meet all applicable requirements of the Paperwork Reduction Act; and,
- Engage in discussions with the Congress, the General Accounting Office, the Office of Management and Budget, General Services Administration, and other oversight organizations so as to more fully and thoroughly comply with external rules, regulations, and policies.

The Information Resources Management Plan (IRMP) is based on a simplified, information-based planning process aimed at broad participation and timely, constructive action. It presents the agency's strategy in the following specific information areas:

1. Airports Information Requirements
2. Air Traffic Control (ATC) and Airspace Information Requirements
3. Aviation Activity Information Requirements
4. Aviation Safety Analysis System (**ASAS**) Information Requirements
5. Financial Resources Information Requirements
6. Human Resources Information Requirements
7. Materiel Resources Information Requirements
8. National Airspace System (NAS) Facilities Information Requirements
9. Office Automation and Management Support Information Requirements
10. Information Processing and Support Information Requirements
11. Human Interface and Training Information Requirements

The objectives of this Systems Plan are to:

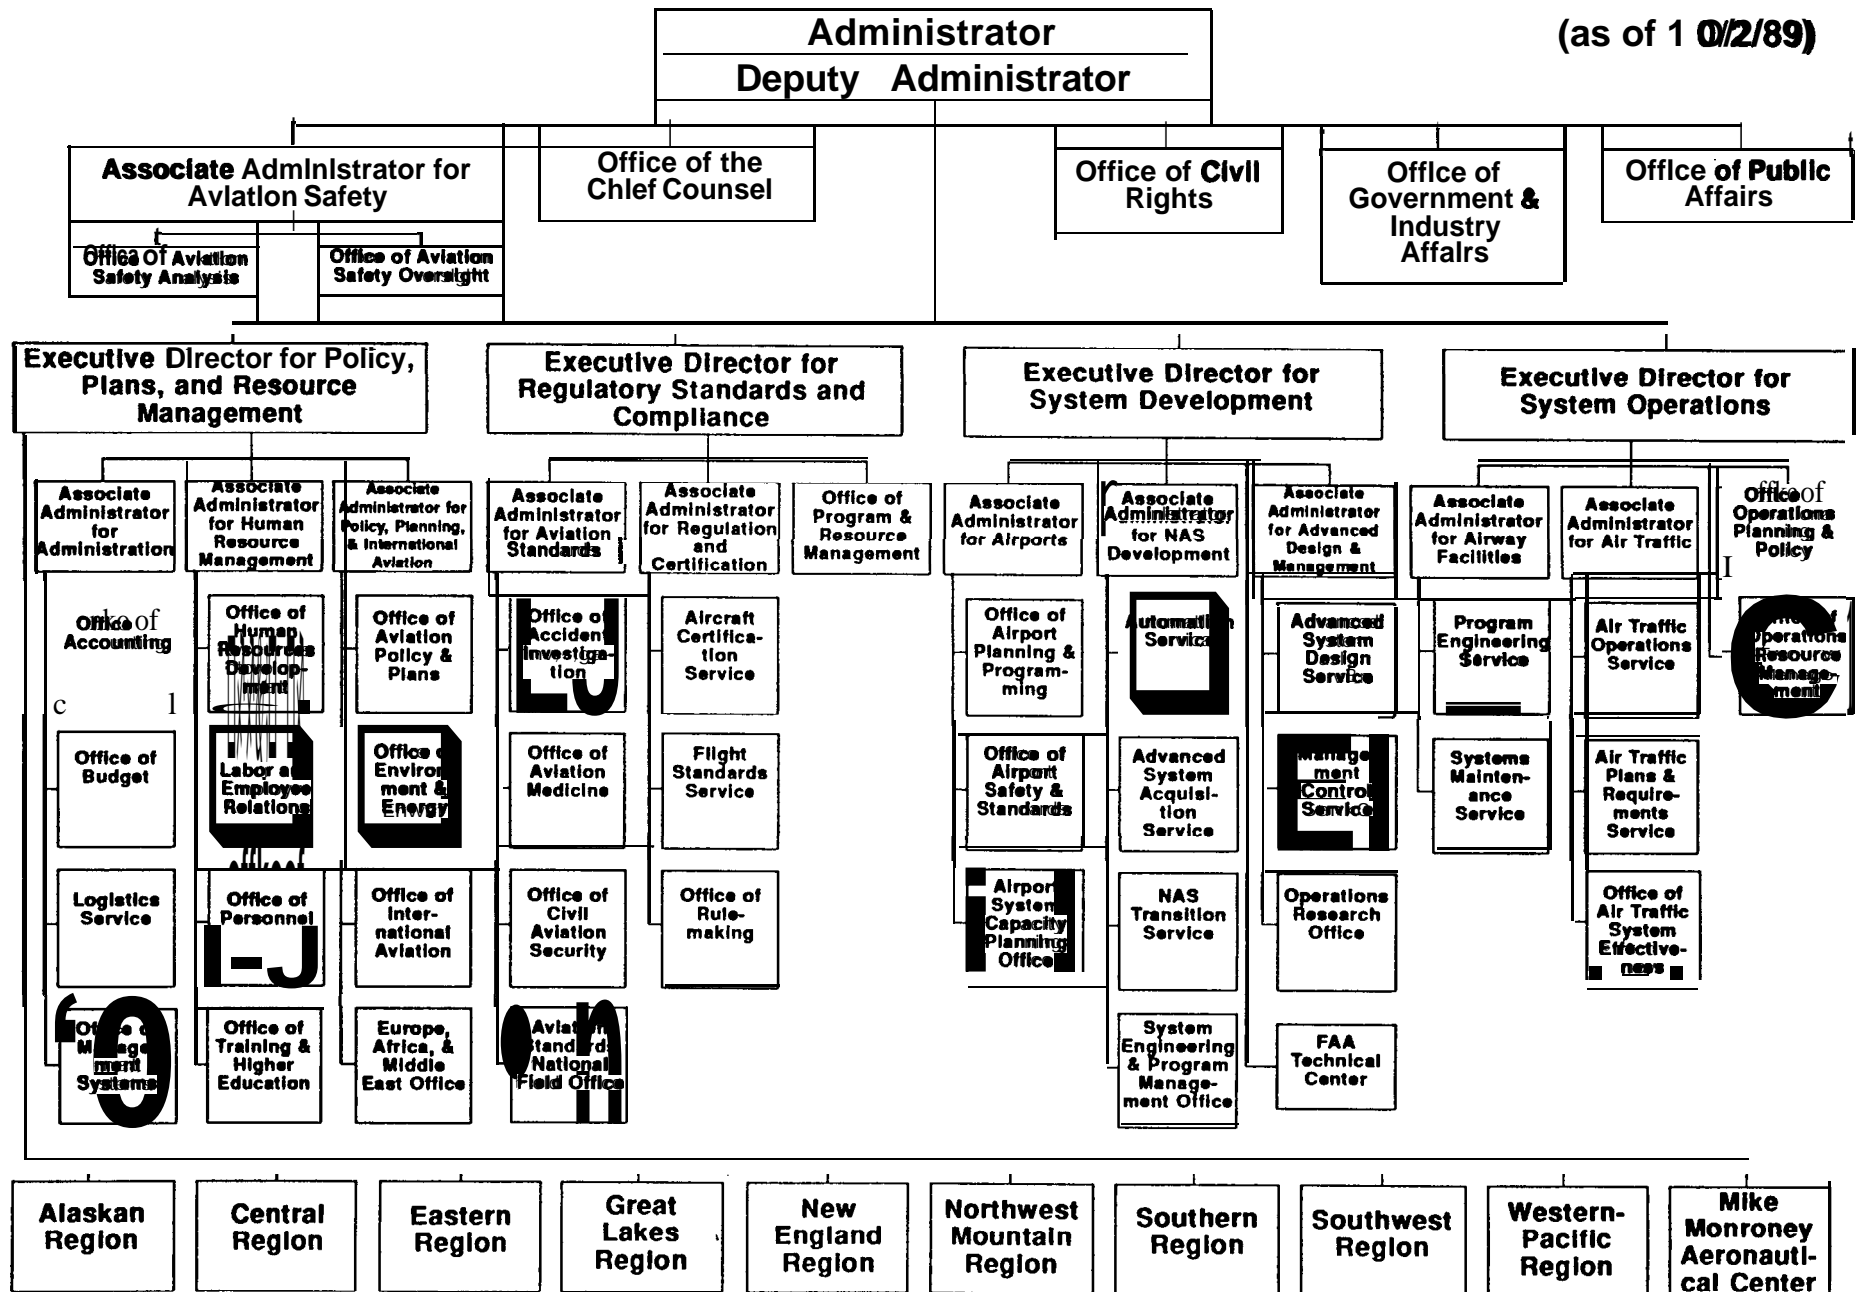

- Improve top management's awareness of IRM projects;
- Coordinate IRM planning with the budget process, and increase user participation in the planning process;
- Act as a catalyst to promote clearer definition of IRM policies within FAA, Order **1370.52C**, *Information Resources Management — Policies and Procedures*;
- Avoid duplication of effort by program offices by encouraging the sharing of resources, where appropriate; and,
- Provide a working document to be used by management to monitor the administration of the agency's IRM program

## **FAA ORGANIZATION**

The Federal Aviation Administration (formerly the Federal Aviation Agency) was established by the Federal Aviation Act of 1958. It became a component

U.S. Department of Transportation  
**Federal Aviation Administration**

(as of 10/2/89)

## **FAA MISSIONS**

The following five mission statements summarize FAA major roles and responsibilities:

1. Promotion of aviation safety;
2. Efficient utilization of airspace;
3. Promotion of air commerce and aviation at home and abroad;
4. Fulfillment of national defense requirements; and,
5. Efficient and economical program administration.

## **FAA GOALS**

In charting a future vision of excellence, the agency is taking an approach to goal-setting keyed to new values, and predicated on concern and commitment for people. The seven general goals of the FAA are:

1. Enhance U.S. Aviation Safety.
2. Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
3. Develop, refine, and implement FAA programs and long-range plans.
4. Assure effective and efficient utilization of human, fiscal, material, and airspace/airports resources.
5. Foster equal employment opportunity programs.
6. Reduce regulatory and administrative burden.
7. Promote USA/FAA pre-eminence in the world aviation community.

## **FAA OBJECTIVES — FY 1989**

In addition to these continuing responsibilities, FAA annually establishes a set of near-term objectives for internal management. The information included in this book contains references to which agency objectives are supported by each development project and ongoing system. This book reflects the status of all projects and ongoing systems as of October, 1989. The agency objectives for FY89 are divided into seven categories. The twenty-five specific FAA objectives for FY 89 are:

### **AVIATION SAFETY:**

- Initiate a test of synthetic vision technology as a pilot aid for adverse weather conditions.
- Implement an aeronautical satellite communications program to improve the safety and efficiency of transoceanic flight.
- Implement an air carrier self-evaluation safety program. Develop the regulatory framework for carriers to "certify" their compliance with Federal Aviation Regulations.
- Conduct at least four (4) safety and efficiency reviews and meet 80% of the corrective action milestones.

- Review the certificated airman training program and begin implementing recommendations.
- Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% from the FY88 base.
- Develop and initiate a comprehensive human factors program for pilots and controllers.
- Establish a comprehensive timetable for implementing the recommendations of the recent International Conference on Aging Airplanes.
- Decrease operational errors by 5% **from** the FY88 base.

#### **CAPACITY:**

- Expand the use of the National Airspace System Performance Analysis Capability (NASPAC) to plan for the needed NAS capacity enhancements.
- Increase en-route airspace capacity by establishing multiple routes between congested terminal areas. Improve the NAS system performance by reducing daily delays of 15 minutes or more by 5% from the FY88 base.
- Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.
- Complete development of criteria, procedures, and standards for the full implementation of the Microwave Landing System (MLS).

#### **THE NAS PLAN:**

- Complete the Microwave Landing System acceptance testing and commission the first site.
- Maintain the thrust of the National Airspace System Plan and achieve 90% of the published milestones, as reflected in the FY89 schedule.
- Publish a Research, Engineering, and Development (**RE&D**) Plan.

#### **GOVERNMENT/INDUSTRY PROMOTION OF AVIATION:**

- Implement a joint military/civil tiltrotor certification program.
- Expand the Minnesota “partnership” example of working closely with a state government to coordinate research programs, aviation career education and training programs, and airport and general aviation planning.

#### **FAA TRAINING:**

- Update FAA training to meet 1990’s technologies by establishing a new office of training and higher education, by conducting three prototype projects in conjunction with universities and industry, and by hosting two symposia on FAA job-related training.

#### **MANAGEMENT/COMMUNICATION:**

- Issue the operating procedures to further implement straight-line management.

- Increase the use of video conferencing to improve agency-wide communications.
- Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

#### **HUMAN RELATIONS:**

- Emphasize professionalism and pride in the FAA work force and increase its involvement in decision-making by taking positive action at all levels of the agency in response to the SFA and by developing a succession plan for career leadership positions.
- Increase the representation of minorities and women by selecting 20% of all new hires from each of these categories to attain a representation comparable to the civilian labor force by the year 2000.
- Improve recruitment of the FAA work force by shortening the hiring process for Air Traffic Control (ATC) specialists by at least two-thirds, by meeting FY89 work force targets, and by developing an alternative compensation program for all safety-related occupations.

#### **FAA OBJECTIVES — FY 1990**

On November 9, 1989, the Administrator approved the agency objectives for **FY90**. All twenty-two of these objectives are listed below. Note that the development projects and ongoing systems presented in this book reflect the IRMP planning database as of October 1989, in relationship to the **FY89** objectives. The FAA objectives for **FY90**:

#### **AVIATION SAFETY AND SECURITY**

- Complete reviews and regulations for correcting aging aircraft problems in all U.S.-manufactured and U.S.-operated airliners by the end of **FY90**.
- Increase to at least ninety-five (95) percent the effectiveness of airline security checkpoints in detecting concealed weapons by the end of **FY90**.
- Improve international aviation security by requiring deployment of at least six state-of-the-art explosive detection systems at international airports, assigning additional FAA security specialists to busy U.S. and overseas airports, validating and offering training and seminars to friendly foreign countries, improving the FAA security bulletin process, assuring state-of-the-art x-ray and metal-detection equipment, and forming a National Aviation Security Advisory Committee to make sure all parties are operating from a common strategy.

#### **CAPACITY AND ACCESS**

- Complete closely spaced parallel runway approach monitor testing and demonstrations.

- By March 1990, develop a comprehensive installation plan for major NAS Plan deliveries.
- Provide leadership, information, issues, advice, and recommendations for the Secretary's effort to develop an integrated National Transportation Policy. Coordinate the FAA's planning with the results of the Secretary's efforts.
- Finalize an FAA Strategic Plan that is coordinated with the Department's National Transportation Policy and carry out actions to implement the strategies by June 1990.

## **ENVIRONMENTAL IMPACTS**

- Propose a national aviation environmental policy, in coordination with the National Transportation Policy, that specifically addresses noise, access, and Federal and local roles in addressing these issues.
- Develop contingency plans to address potential energy shortages and major energy price increases as they affect system operations.

## **HUMAN FACTORS**

- Publish and begin implementing a NAS Human Resource Management Plan that addresses the critical human resource impacts of NAS transition.

## **INTERNATIONALIZATION**

- Accelerate the agency's work on unifying **JARS** and **FARs** in order to promote international aviation safety and to maintain U.S. leadership.
- Continue close coordination with all international agencies to ensure movement toward a standardized security process.

## **MANAGEMENT OF THE AGENCY**

- Develop a strategic plan for supervisor/manager/executive development that will guide the design and implementation of a comprehensive system for the 1990s.
- Establish and implement an agency policy that institutionalizes the principles of total quality management; train selected senior agency managers in those principles.
- Implement a program within each organization to reduce administrative time to respond to internal and external requests, through automation, other technology, or procedural changes.
- Increase public awareness of the economic benefits of aviation and the agency's efforts to increase system capacity and to mitigate the adverse effects of noise.
- Increase the representation of minorities and women at all levels of the agency, with the goal of attaining representation comparable to the civilian labor force by the year 2000.
- Develop and establish an effective, comprehensive, nation-wide human resource strategy to recruit and retain qualified employees and managers throughout the agency.

- Develop and implement an effective, requirements-driven budget process.
- Revalidate the priorities established in the Flight Plan for Training and implement them.

## **TWENTY-FIRST CENTURY AVIATION SYSTEM**

- Have in place an agency-wide strategic management process within the FAA that will interact with the international aviation community to define, design, develop, and achieve the acceptance of a global air transportation system evolved from the NAS Plan system to serve aviation in the twenty-first century.
- Publish an “**ATC System *Capital Needs***” document expanding on the current NAS Plan during 1990.

## **IRM PROGRAM CONCEPTS**

The agency’s overall approach to managing and administering the Information Resources Management program is encompassed in the following features:

- Long-term strategic plans and short-term tactical plans regularly reviewed and updated to serve as the basis for management direction;
- An agency Senior Management Official for Information Resources Management who, on behalf of the Administrator, executes all IRM-related responsibilities, which encompasses policy and program management, planning, information systems management, and acquisition of information resources;
- Participation by the Executive Resource Committee to ensure top management attention and involvement in major decisions on IRM priorities, policies, and direction;
- Central IRM organizations providing the general-purpose hardware and software needed to support essential information activities of the FAA, and providing the standards, procedures, and technical expertise needed for their efficient utilization;
- An Information Resources Management Division within the Office of Management Systems to coordinate and integrate the efforts of the individual program organizations into an effective and efficient agency-wide IRM program;
- Information Resources Managers who are responsible for identifying and documenting the IRM needs and requirements of their respective offices, services, regions, and centers, and for coordinating all IRM-related activities within their program organization;
- An Information Resources Management Committee to provide a vehicle for coordinating, consulting, and/or advising the Office of Management Systems, the Executive Resource Committee, and the Senior Management Official for IRM on proposed information resources management plans, programs, policies, procedures, and standards; and,

- A policy of having Headquarters program offices plan and fund their own vertical office automation efforts has been adopted as a logical extension of the current emphasis on organizational control of systems and software development, implementation, and maintenance. “Vertical” in this concept refers to organizational functionality from the Headquarters level down through the regions to the field offices. This particular feature adds significance to the relationship between Headquarters **IRMs** and the regional **IRMs** in assuring requirements are made known for office automation planning as well as other systems planning. The vertical approach permits the national program organizations to plan, fund, and implement their systems in association with the provision of office automation capabilities in Washington Headquarters, the regional offices, and appropriate field offices.

## **CONTENTS OF THE SYSTEMS PLAN (FY89-FY93)**

This Systems Plan is organized into 16 sections. Section 2.0 provides an Executive Summary of the Systems Plans for **FY89-FY93**. Specifically, Section 2.0 includes:

- Governing Management Policies and Strategies;
- Information Resources Management Organization;
- Current Environment;
- Resource Requirements; and
- Office of Management Systems (AMS) FY 1990 Management Objectives.

Sections 3.0 through 13.0 each include summary information on resource requirements and a list of IRM development projects that fall within each IRM information area. The summary tables are followed by individual project summary pages for each active project in the FY 1989-93 program. Section 14.0, *Other Information Area*, is included to accommodate projects which do not appropriately fall in one of the other information area categories. Section 15.0, *Records Management Information Area*, is an information area category established in FY 1987.

Section 16.0, *Ongoing Systems*, presents summary tables and individual fact sheets for the ongoing systems applicable to each information area, and are presented in the same sequence as the development projects. Appendices to this Plan include alphabetical, numerical, and information area indices to projects, ongoing systems, and a glossary of terms and contractions.

## **PROJECT NUMBERING SYSTEM**

IRM development projects and ongoing systems are assigned six-digit identification numbers comprised of: codes for the Responsible IRM Organization (the first two digits), the Information Area (the middle two digits), and the Project or System Number (the last two digits). The Project or

System Number is assigned by the IRMP Automated Update Application to provide unique identification. This identifier can be any number from 01 to 99. The codes for the first pair of numbers are shown below. The codes for the second pair of numbers is shown on the following page.

## RESPONSIBLE IRM ORGANIZATION (First Two Digits)

### Organization Number

- 01 Associate Administrator for Administration (**AAD**)
- 02 Associate Administrator for Air Traffic (**AAT**)
- 03 Assistant Administrator for Civil Rights (ACR)
- 04 Associate Administrator for Airway Facilities (AAF)
- 05 Chief Counsel (AGC)
- 06 Assistant Administrator for Public Affairs (**APA**)
- 07 Associate Administrator for Policy, Planning, and International Aviation (API)
- 08 Associate Administrator for Airport System Development (ARP)
- 09 Associate Administrator for Aviation Standards (AVS)
- 10 Director, Mike Monroney Aeronautical Center (AAC)
- 11 Regional Administrator, Alaskan Region (**AAL**)
- 12 Regional Administrator, Central Region (ACE)
- 13 Director, Technical Center (ACT)
- 14 Regional Administrator, Eastern Region (AEA)
- 15 Regional Administrator, Great Lakes Region (AGL)
- 16 Regional Administrator, New England Region (ANE)
- 17 Regional Administrator, Northwest Mountain Region (ANM)
- 18 Regional Administrator, Southern Region (**ASO**)
- 19 Regional Administrator, Southwestern Region (ASW)
- 20 Regional Administrator, Western-Pacific Region (AWP)
- 21 Associate Administrator for Aviation Safety (ASF)
- 22 Associate Administrator for Human Resource Management (AHR)
- 23 Associate Administrator for Advanced Design and Management Control (ADM)
- 24 Associate Administrator for NAS Development (AND)
- 25 Director, Office of Program and Resource Management (APR)
- 26 Associate Administrator for Regulation and Certification (AVR)
- 27 Assistant Administrator for Government and Industry (AGI)
- 28 Director, Office of Operations Planning and Policy (AOP)
- 29 Director, Office of Operations Resource Management (AOM)

## INFORMATION AREA (Second Two Digits)

Information  
~~Area Number~~<sup>2</sup>

- 03 Airports
- 04 Air Traffic Control (ATC) and Airspace
- 05 Aviation Activity
- 06 Aviation Safety Analysis System (**ASAS**)
- 07 Financial Resources
- 08 Human Resources
- 09 Materiel Resources
- 10 National Airspace System (NAS) Facilities
- 11 Office** of Automation and Management Support
- 12 Information Processing and Support
- 13 Human Interface and Training
- 14 Other
- 15 Records Management

---

[2] Also IRMP Strategic Overview Chapter Number, except for 14 (*Other*).

## **2.0 EXECUTIVE SUMMARY OF THE SYSTEMS PLAN FOR FY89-FY93**

## **2.0 EXECUTIVE SUMMARY OF THE SYSTEMS PLAN FOR FY89-FY93**

## **2.0 EXECUTIVE SUMMARY OF THE SYSTEMS PLAN FOR FY89-FY93**

### **2.1 GOVERNING MANAGEMENT POLICIES AND STRATEGIES**

#### **GENERAL MANAGEMENT POLICY**

The FAA general Information Resources Management Program policy, which was established by FAA Order **1370.52B**, *Information Resources Management-Policies and Procedures*, is to:

- Utilize automated information systems whenever such use is expected to result in improved performance of the mission of FAA, increased management effectiveness of FAA operations, or specific cost savings or cost avoidance;
- Utilize the most advanced, proven ADP design techniques, but only when they promise to provide efficient and effective results;
- Provide central management overview of all IRM activities to ensure adequate consideration of objectives, to maximize utilization of available resources, and to provide a continuous evaluation of IRM management effectiveness from an overall agency perspective;
- Give priority to the development of major ADP applications or significant expansions to existing applications which have the greatest potential return in relation to the agency's total mission; and,
- Provide for rejustification of automated information systems on a recurring basis.

#### **PLANNING POLICY**

The basic elements of information resources management planning in FAA are included in this Systems Plan, which is a short-term tactical plan. Projects identified in this document were approved by top management officials, and they serve as a basis for:

- Bringing information system activities into proper relationships with changing agency missions and objectives;
- Committing all agency organizations to schedules, actions, functional relationships, and costs;
- Assigning resources and priorities to the range of information needs, action plans, and improvement opportunities;
- Planning and budgeting within all appropriations and organizations as it relates to information resources activities; and,

- Accounting for performance both functionally and financially for information resources activity results.

## **FUNDING POLICY**

Each national program organization will budget and fund efforts for all end-user computing power requirements, and will include their share of the budgetary requirements of the common system in their budgets, to the extent feasible.

## **DATA MANAGEMENT POLICY**

The fundamental data management principle adopted by the FAA is that control of data is central to system design, including obtaining data input, conversion to machine readable form, and editing as close to the source as possible. To accomplish this:

- Data editing and routine checking, error identification, correction, control, and updating are performed by machine as quickly as possible after entry and with minimal human intervention;
- Data collection, quality assurance, and its responsibility are located as close as possible to those most knowledgeable about the substance of the information — the generating source;
- Data elements are entered once and, thereafter, are used and reused by anyone who needs them. However, each data element should be stored in one location, and should not be copied without careful consideration of data integrity problems and alternative solutions;
- Data collection responsibility should be assigned to those who can most effectively carry it out, regardless of their need for data;
- Data access should be given to those who need the data without regard to their organizational affiliation or geographic location, but with due regard to rights of individual privacy and data security; and
- The agency's data should be regulated via agency data dictionaries. Once established, all changes to data element names, codes, and definitions will be managed through FAA's data dictionaries.

## **ADP EQUIPMENT POLICY**

A systems integrator concept for ADP will be the backbone for FAA ADP equipment configurations. A single vendor will provide equipment and support to meet all of the ADP large-scale host computer resource requirements, and will provide facilities to accommodate all the host resources. Further, the vendor will provide for upgrades and enhancements to support any new workload requirements, and will install the latest, most cost-effective technology, both hardware and software. The FAA will divest itself of all technical and operational functions for supporting the common system of equipment currently in place.

The implementation of the new system integration approach should result in the benefits listed on the following page:

- User-operated equipment at each user's desk, or nearby, that will provide ready access to the host system or systems;
- More comprehensive consideration of information required by users regardless of the organizational or geographical location of the user or the data resource;
- Overall improvement of general-purpose ADP service levels to satisfy all program office needs;
- Increase employee access to high quality ADP resources yielding improvement of overall productivity;
- Provide for the development of chargeback mechanisms and more effective and current ADP standards; and
- Ensure that the agency has easy, rapid access to appropriate improvements and developments in computer technology by shortening the procurement process in future years.

## SOFTWARE POLICY

The agency's basic policy is to minimize software development and maintenance costs by supporting data systems with FIPS-compatible, general-purpose, standardized software. This means that:

- Whenever and wherever possible, existing software packages that satisfy a user's requirements will be used instead of developing new application software;
- Software will be documented, configured, and maintained in such a way as to reduce reliance upon the individuals or specific organizations who operate, modify, or enhance the software;
- All software will be managed in an orderly manner reflecting sound industry practices, including:
  - Isolation of function in a distinct manner and standardization of interfaces between functions;
  - Clarification of the meaning of code, including readability, ease of understanding, and modification;
  - Incorporation of suitable data access and security methods; standardization of data; and portability of application software;
  - Movement toward database management systems; and
  - Newer and more powerful programming languages.
- General-purpose software will be managed in order to control access, modifications, security, maintenance, software version control, release specifications, and libraries.

## 2.2 INFORMATION RESOURCES MANAGEMENT RESPONSIBILITIES

### RESPONSIBILITIES

Senior Management Official (SMO). Public Law P.L. 96-5 11, *The Paperwork Reduction Act of 1980* requires each Federal executive department to designate a senior management official to execute the IRM responsibilities of the agency head. DOT's Assistant Secretary for Administration (M-1) has been designated as the SMO at the Department level. Similarly, the Administrator has designated the Associate Administrator for Administration (**AAD- 1**) as the focal point for IRM within FAA as it pertains to PL. 96-5 11. The agency SMO executes all IRM-related management, policy, and oversight responsibilities on behalf of the Administrator, and has direct operational responsibilities for some specific IRM functions.

Executive Resource Committee. The FAA Executive Resource Committee assists the Administrator by reviewing matters of agency policy and other critical issues. Major decisions on IRM priorities, policies, and direction will be referred to the Committee to ensure top management attention and involvement.

**Office of Management Systems (AMS).** The Office of Management Systems provides staff support, advice, and assistance to the Senior Management Official for IRM. AMS also provides overall technical direction and technical staff support for all matters related to the agency automated information systems, office automation systems, data communications equipment, and all associated software, and standards. AMS is responsible for providing a master plan to meet current and future requirements for the common system of support facilities within the framework of the IRMP, and for translating this master plan into budgetary requirements.

Information Resources Management Division. Under the management direction of AMS, the division is responsible for overall direction of all FAA activities needed to successfully implement the requirements of the Paperwork Reduction Act and **FIRMR**. The division also consults with and obtains input from **IRMs** and the IRMC concerning major IRM issues.

Information Resources Managers (**IRMs**). Associate administrators, regional administrators, and center directors designate an Information Resources Manager within their respective organizational jurisdiction. The degree to which each associate administrator, regional administrator, or center director delegates responsibility and authority on information resource management matters or chooses to exercise them on his own behalf is **a matter** of individual judgement. As an individual IRM, the designee acts for the associate administrator, regional administrator, or center director within his organization.

Information Resources Management Committee (IRMC). The **IRMC** is made up of all of the designated Information Resources Managers. In addition, the Directors of Management Systems and the Aeronautical Center

designate technical representatives to represent the “providers” of IRM services. The IRMC has established subcommittees to focus on key IRM areas, and an Executive Committee to plan and coordinate IRMC activities.

**Project Managers.** Project managers, in coordination with the appropriate IRM, are responsible for:

- Carrying out the development of a particular automated information system by coordinating the efforts of users, developers, operators, and contractors associated with that system;
- Managing and reporting on project schedules, costs, and other supporting resources for the **IRMs**;
- Establishing and maintaining a positive change control management system through the developmental and implementation phases to ensure that the completed project — the operational information system — meets the requirements of the system definition;
- Determining that all proposed changes are essential to the development task, and that changes are coordinated among **all** prospective users of the automated information system;
- Keeping contracting officers advised, if appropriate, on proposed changes so that the contracting officer may be alerted to the impact the proposed change may have on current or proposed contractual actions;
- Preparing for and participating in operational tests and evaluations of the automated information system; and,
- Ensuring compliance with the security provisions of the Privacy Act, the Computer Security Act of 1987, OMB Circular A-130, and Order **1600.54B** *FAA Automated Information Systems Security Handbook*.

**Program Organizations.** Program organizations (i.e., the offices, services, regions, centers, field organizations, and the component elements of these organizations through which the agency does its work) retain primary responsibility for managing their information resources. This includes identifying program requirements for information systems, initiating actions to enter new projects into the systems plan, and updating descriptions of projects and ongoing systems already in the systems plan.

Program organizations obtain resources to support the ongoing operation of information systems. These organizations program resources for end-user computing requirements and the organization’s share of the usage of the common system. The **IRMs** representing national program offices have the additional responsibility for developing, planning, and assuring funding for the office automation needed by their own and counterpart program offices. Such plans are coordinated with the affected counterparts through the regional **IRMs**.

**Data System Managers.** Data System Managers are the official representatives of the Office of Primary Responsibility and are responsible for ensuring the successful ongoing operation of the automated information systems.

**Office** of Civil Aviation Security. The Office of Civil Aviation Security is responsible for automated information systems security for the agency.

Aeronautical Center (AAC). The Aeronautical Center, as the major source of in-house ADP services, has day-to-day operating responsibility for the hardware, software, and telecommunications support for many national systems. In addition, AAC serves as the technical integration center for all national systems using its ADP facility.

Logistics Service. The Logistics Service, which reports to the Associate Administrator for Administration, has responsibility for providing advice on all relevant procurement matters, and for providing procurement support to **IRMs**, project managers, information systems managers, and program organizations.

## 2.3 CURRENT ENVIRONMENT

### HARDWARE

To accommodate the administrative ADP workload, the FAA uses a combination of agency-owned computers, leased computers, commercial ADP services, and other shared government computer facilities (for example, the Department's Transportation Computer Center (**TCC**) in Washington, D.C. and the Transportation Systems Center (TSC) in Cambridge, Massachusetts). However, the agency has an ongoing acquisition effort — the Computer Resources Nucleus (CORN) project- which is intended to provide uniform, large-scale, general-purpose ~~ADP resources~~ and replace the existing IBM and Data General (**DG**) mainframes agency-wide. Once the contract is awarded, the **CORN** vendor will be responsible for converting the applications systems, turning them back to FAA for maintenance, and for providing the ADP resources necessary to process the applications.

### ADP FACILITIES

Major ADP facilities plus other support facilities are described in the paragraphs which follow.

Headquarters. For support of timesharing, national data systems, and data interchange with the regional offices, the Headquarters facility has two Data General **MV/15000** computers, and significant data/word processing capability is provided through a Wang **VS300** and three **VS1000** systems. ADP support of FAA Headquarters also is provided by the Department of Transportation (DOT) Transportation Computer Center which provides **ADP** support to all Washington, D.C. elements of DOT.

Aeronautical Center. This is the ADP facility responsible for supporting selected, centralized information systems of the agency. Their ADP facility consists of an **IBM 3084** and two Data General **MV/15000** computers. The Flight Standards National Field **Office**, located at the Aeronautical Center, also has a Data General **MV/15000** computer.

FAA Technical Center. This ADP facility is responsible for providing engineering and scientific support to the Center, as well as associated administrative support services. Their ADP facility consists of a Honeywell 6600 computer for engineering and scientific support and two Data General **MV/15000** computers for administrative support. A number of other computers exist at the Center, and are dedicated to particular technical projects.

Regional **Offices**. Each regional office provides primary ADP support at a regional facility housing Data General **MV/15000** computer systems.

Remote Field Facilities. These are computer terminals and micro/mini-computers that are dedicated to the support of a particular application as performed in a small entity of the agency. Differing from the following category of autonomous facilities, these facilities generally include the entering of data **that** eventually will be stored and accessed by organizational elements at various levels throughout the agency. The remote field facilities

presently include Burroughs word processing computers used at Flight Standards Field **Offices**; Tandem computers used for the monitoring of several hundred remote, unmanned radar and navigation facilities to sense equipment failures; and, micro-computers to support program-specific local automation activities, such as gathering data regarding the performance of all equipment used in the NAS.

**Autonomous Facilities.** These ADP facilities are dedicated to the support of a single application, and seldom is access to the data required from points external to the particular application. These facilities include the Honeywell computer at the FAA Technical Center which is dedicated to local research, development, testing, and engineering applications; specific computers at the Civil Aeromedical Institute (**CAMI**) which are dedicated to scientific projects; the computers installed in FAA airplanes for the aerial inspection of air traffic control and navigation systems; and, particular computers used for generating the graphics associated with instrument landing approach procedures.

**Timesharing Services.** Both interactive and batch services are extensively used by the regional offices, two centers, and Headquarters in support of a broad variety of localized and agency-wide applications. These services are primarily acquired from commercial timesharing vendors. Additionally, services are acquired on an inter-services basis from federal agencies.

## **OTHER HARDWARE**

The Honeywell 6600 at the FAA Technical Center and the VAX 11/780 at the **CAMI**, in Oklahoma City, Oklahoma, are used to support research and development activities.

## **MICRO-COMPUTERS**

Though the major support is currently provided through the above resources, micro-processors continue to account for a significant portion of the agency's hardware resources. In excess of 7000 micro-computer systems, representing 57 different manufacturer brand names, are currently installed. The proliferation of brands also denotes an area of increased usage of office automation technology and applications throughout the agency. This usage is in line with the strategy laid out in the IRMP for the agency's information processing support posture; however, the adverse impact from proliferation of brands is being addressed by the introduction of uniform systems via the Office Automation Technology and Services (OATS) program.

Once implemented, OATS will serve as a Department-wide contractual mechanism for obtaining and promoting uniformity of office automation equipment and services, including hardware, software, interconnectivity, training, installation, maintenance, and technical services, and will facilitate the compatibility and standardization of office-based information technology and services throughout FAA. The number of office automation projects in the plan and inherent equipment implications point to the concept taking hold.

## ONGOING SYSTEMS SUPPORT

Automated systems support most of FAA's functions. However, the extent and type of functional support varies from office to office. In the past, the primary development support was derived from ADP staffs in the regions, centers, and headquarters. Due to staffing constraints and increased workload, more and more efforts are being developed contractually. In the future, each organization will be responsible for their own developmental efforts with lessening reliance on the ADP staffs. The table below shows, by information area, a summary of reported active ongoing systems. Specifics regarding ongoing systems are in Section 16.0 of this plan.

### Summary of Active Ongoing Systems

information Area	Number of Ongoing Systems
Airports	11
Air Traffic Control (ATC) and Airspace	13
Aviation Activity	5
Aviation Safety Analysis System (ASAS)	10
Financial Resources	38
Human Resources	25
Materiel Resources	23
National Airspace System (NAS) Facilities	25
Office Automation and Management Support	24
information Processing and Support	8
Human Interface and Training	8
Other	30
Records Management	4
<b>TOTAL</b>	<b>224</b>

## SOFTWARE

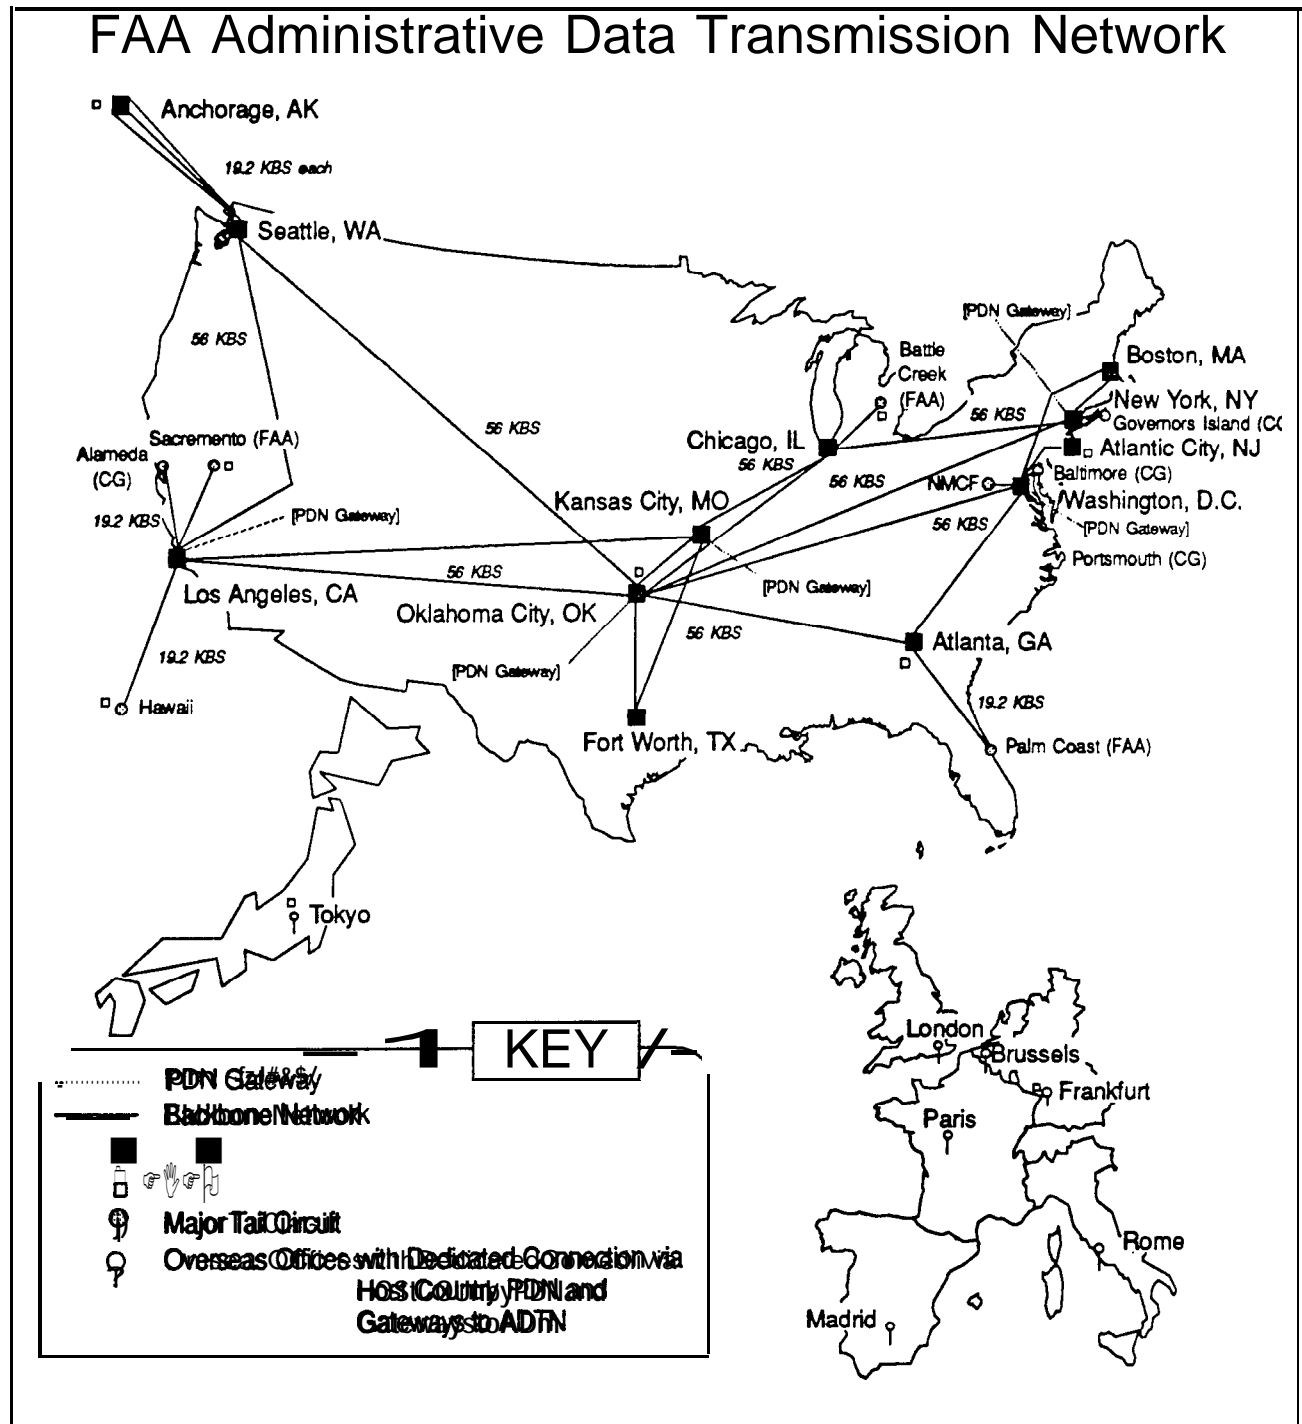

The agency's software environment is basically COBOL with a few FORTRAN applications. The major database management system is ADABAS on the IBM 3084 in Oklahoma City. The regions' and centers' DG MV/15000 computers use the INFOS data management system and DG/DBMS. Other predominant database management systems used are the FAA-owned version of System 2000, and the Retrieval and Update System (RUS).

The thrust of office automation efforts represents a significant change with regard to agency software. The use of "fourth-generation" software packages typically calls for less reliance on traditional ADP staff resources. An emergence of "decision support systems" software is taking place under the umbrella of office automation.

## TELECOMMUNICATIONS

Nearly every organization within the FAA uses the computer-based information systems which are resident on ADP equipment at the Aeronautical Center, Oklahoma City; the FAA Technical Center, Atlantic City; Head-

quarters in Washington, D.C.; the Department's Transportation Computer Center, Washington, D.C.; the Transportation Systems Center, Cambridge, MA; the **SEIC**, Washington, D.C., and at all regional offices. The Administrative Data Transmission Network (ADTN) provides end-to-end connectivity between users throughout the country and these **ADP host** facilities. The ADTN also provides connectivity to international field offices such as Brussels, London, Rome, Madrid, Paris, and Tokyo. The ADTN telecommunications equipment is FAA-leased-to-purchase, while the major haul trunks and the tail segments are all leased. Refer to the map below.

The ADTN is a fully private packet switched network with an initial backbone comprised of 16 node switches and 56 kbps digital trunk circuits. FY 1990 will bring the addition of all **ARTCCs** as node sites, bringing the total node sites to 35. It was designed with a 50 percent excess capacity from the outset, and a growth capability to accommodate all projected FAA and DOT requirements. Contractor support is used to operate, maintain, and expand the network. It is managed by the Telecommunications Operations and Administration Program Branch (ASM-310).

The ADTN provides end-to-end connectivity for interactive and batch data transfer for host-to-host, host-to-terminal, terminal-to-host, and **terminal-to-terminal** operations. Service for remote users is extended through the use of dial-up via a public data network and gateways into the ADTN. All host computers are interfaced to the network and all major concentrations of user equipment have dedicated (hard-wired) access to the network. In addition, the ADTN provides inter-network gateways to interface other networks on systems such as computer resource timeshare, Telex, and local area networks. The ADTN also provides a standardized FAA-wide electronic mail/message service. All dedicated links using commercial facilities are encrypted for privacy and security. In the future, FAA will look towards transition to the new Government-wide FTS-2000 contract.

## TELECOMMUNICATIONS BUDGET

The Telecommunications Operations and Administration Program is directly responsible for providing telecommunications connectivity FAA-wide. Services provided include voice systems, data facsimile, video, local and FTS service (leased lines, **PBXs**, etc.), office automation communications, and micro-computer (PC) communications. For planning purposes, the following depicts the administrative telecommunications budget:

	<del>FY90</del>	<del>FY91</del>	<del>FY92</del>	<del>FY93</del>
\$ (Millions)	40.8 <sup>(1)</sup>	42.5	43.7	44.7

---

[1] New **PBXs** for all regions, **ARTCCs**, Emergency Operation Facilities, and **Central Flow Control Facility**.

The ADTN is a fully private packet switched network with an initial backbone comprised of 16 node switches and 56 kbps digital trunk circuits. FY 1990 will bring the addition of all **ARTCCs** as node sites, bringing the total node sites to 35. It was designed with a 50 percent excess capacity from the outset, and a growth capability to accommodate all projected FAA and DOT requirements. Contractor support is used to operate, maintain, and expand the network. It is managed by the Telecommunications Operations and Administration Program Branch (ASM-310).

The ADTN provides end-to-end connectivity for interactive and batch data transfer for host-to-host, host-to-terminal, terminal-to-host, and **terminal-to-terminal** operations. Service for remote users is extended through the use of dial-up via a public data network and gateways into the ADTN. All host computers are interfaced to the network and all major concentrations of user equipment have dedicated (hard-wired) access to the network. In addition, the ADTN provides inter-network gateways to interface other networks on systems such as computer resource timeshare, Telex, and local area networks. The ADTN also provides a standardized FAA-wide electronic mail/message service. All dedicated links using commercial facilities are encrypted for privacy and security. ## PLANNED COSTS BY INFORMATION AREA

The following three charts<sup>2</sup> show the proportions of currently planned efforts against the information areas analyzed in the Strategic Overview and included in Sections 3.0 through 15.0 of this document.

Number of **IRM** Development Projects by Information Area  
(Total = 64 Projects)

Fiscal Year 1989 Development Costs by Information Area  
(Total = \$54.6M)

[2] Note: Numbers may not add due to rounding.

**FY89-FY93 Development Costs by Information Area**  
(Total = \$522.3M)

The following table provides total development costs for all active and future projects included in the program. Total past and future development costs for active projects are shown in the first column followed by FY89 and subsequent years covered by this plan. The last column shows the total development costs for the five-year planning window.

#### IRM Development Costs by Information Area

INFORMATION AREA	TOTAL <sup>4</sup>	DEVELOPMENT COSTS (in \$MILLIONS)					
		FY89	FY90	FY91	FY92	FY93	FY89-93
Airports	7.4	1.4	0.9	1.5	0.6	0.0	4.4
Air Traffic Control (ATC) and Airspace	27.6	0.7	1.0	8.5	8.4	2.9	21.5
Aviation Activity	0.0	0.0	0.0	0.0	0.0	0.0	0.0
Aviation Safety Analysis System (ASAS)	414.8	11.7	17.8	54.1	55.7	54.7	193.9
Financial Resources	5.1	1.4	1.5	0.3	0.0	0.0	3.2
Human Resources	10.8	0.8	2.0	1.8	1.1	1.1	6.9
Material Resources	31.9	5.0	4.5	3.6	0.4	0.4	13.9
NAS Facilities	10.4	0.0	2.1	2.2	2.2	1.9	8.4
Office Automation and Management Support	148.6	14.8	25.8	36.9	23.5	18.8	119.8
Information Processing and Support	154.9	18.4	13.6	50.8	66.0	0.2	149.0
Human Interface and Training	8.5	0.0	0.0	0.0	0.0	0.0	0.0
Other	0.6	0.4	0.1	0.0	0.0	0.0	0.5
Records Management	1.2	0.1	0.3	0.3	0.1	0.1	0.8
<b>TOTAL</b>	<b>821.8</b>	<b>54.6</b>	<b>69.7</b>	<b>160.0</b>	<b>158.0</b>	<b>80.0</b>	<b>522.3</b>

[3] Note: Numbers may not add due to rounding.

[4] The TOTAL column includes prior year costs.

## PLANNED COSTS BY BUDGET CATEGORY

The distribution of cost elements (objects of expenditure) for development projects in this plan are shown below. The categories shown are subtotals of a more detailed breakdown which is available for cost monitoring and budget analysis purposes. The Services category ~~includes~~ <sup>5</sup> commercial and other Federal government costs outside the FAA.

**Fiscal Year 1989 Development Costs by Budget Category**  
(Total = \$54.6M)

**FY89-FY93 Development Costs by Budget Category**  
(Total = \$522.3M)

[5] Note: Numbers may not add due to rounding.

## FAA MISSIONS SUPPORTED

An indication of the distribution of FAA missions supported by IRM development projects is shown below. The segments are based on the missions cited in individual project plans, including those which cite multiple missions. Since this plan does not include real-time automation segments of the NAS, the distribution is weighted toward the internal management of the agency.

**Distribution of FAA Missions Addressed by  
Development Projects**

## SIGNIFICANT IRM ACTIVITIES

The schedule which follows, on the next page, shows the costs for the largest 20 IRM development projects in descending order of total development costs.

## Major IRM Projects — Descending Total Costs

Project Number	Title	FY89 Dev. Cost (\$M)	FY89-93 Dev. Cost (\$M)	Total Dev. Cost (\$M)	Compl. Date
250601	Aviation Safety Analysis System (ASAS) Development	10.9	187.1	407.5	SEP-97
011212	Computer Resources Nucleus (CORN)	18.1	147.1	1525	SEP-92
241101	NAS Management Office Automation Program (NASMAP)	6.4	59.0	71.7	SEP-95
100806	Logistics and inventory System (LIS)	4.2	11.6	24.7	NOV-91
020406	National Flight Data Center (NFDC) Aeronautical information Management Program	0.3	21.1	21.3	SEP-93
101101	Office Automation, Aeronautical Center	2.6	19.9	20.8	SEP-92
141113	Office Automation - Eastern Region	0.9	120	125	SEP-93
041001	Telecommunications Information Management System (TIMS)	=	a.4	10.4	DEC-95
101374	Air Traffic (Aviation) Standards CBI Expansion	=		8.5	DEC-90
191101	Automated Management Information, Southwest Region (SWAMI)	=	4.7	6.6	DEC-91
210803	National Aviation Safety Data Center Program	0.3	5.4	5.4	SEP-93
171101	Office Automation, Northwest Mountain Region	1.3	3.1	5.0	SEP-97
220804	Training Management Information System	=	3.2	4.1	SEP-94
020421	Air Traffic Administrative Management System (ATAMS)	=	=	4.1	JUN-90

010910	System for Acquisition Management	0.3	1.6	3.7	JUN-93
220801	MATES - Modular Applicant Testing, Examining, and Screening	0.4	1.7	3.2	SEP-90
181107	ASO Office Automation	0.4	26	3.2	SEP-93
071101	Office Automation, Phase I (API)	0.5	0.6	3.0	DEC-89
011115	Office Automation (ALG)	0.4	1.2	3.0	JUN-91
<b>Totals</b>		48.0	4920	774.8	
All other Projects		6.6	30.4	47.1	
<b>Grand Totals</b>		54.6	5223	821.9	

## BUDGETING FOR RESOURCES REQUIREMENTS

The agency currently does not have a direct tie between the budgetary process and the **IRM** Systems Plan; however, the budget figures do reflect the most current information available. Project development plans are based upon identified agency needs and requirements, but do not, necessarily, constitute full funding approval at this time.

The **ADP** program budget includes funds for the continued operation of the administrative **ADP** facilities at headquarters, regions, and centers; for replacement equipment being acquired for system implementation, etc.; and, for supporting ongoing systems operation for all agency program areas.

The budget figures shown on the **FY90 - FY93** Obligations and Inventory of **ADP** Systems chart on the following page reflects consolidated planning figures for **ADP** administrative systems, excluding the NAS system, for most of the headquarters program offices.

## Major IRM Projects — Descending Total Costs

Project Number	Title	FY89 Dev. Cost (\$M)	FY89-93 Dev. Cost (\$M)	Total Dev. cost (\$M)	Compl. Date
250501	Aviation Safety Analysis System (ASAS) Development	10.9	187.1	407.5	SEP-97
011212	Computer Resources Nucleus (CORN)	18.1	147.1	1525	SEP-92
241101	NAS Management Office Automation Program (NASMAP)	6.4	59.0	71.7	SEP-95
100806	Logistics and inventory System (LIS)	4.2	11.6	24.7	NOV-91

## 2.5 OFFICE OF MANAGEMENT SYSTEMS (AMS)

### FY 1990 MANAGEMENT OBJECTIVES

**1. Implement Total Quality Management In the Office of Management Systems (AMS).**

FY 1990 marks the beginning of the **Office of Management Systems'** implementation of Total Quality Management (**TQM**). The evolution into TQM, which will extend over several years, involves a cultural change in management attitude and philosophy. The emphasis of TQM is on meeting customer requirements while eliminating errors and tardiness.

**2. Award the CORN Contract and Begin Its Implementation.**

This project supports the ADP needs of the agency by creating a uniform, agency-wide, administrative computing resource. Using this new resource will alleviate the inconsistencies and capacity shortfalls of the current ADP system and will actively avoid them in the future. To accomplish this, the project will contract ADP services to provide total facilities management and turnkey operations.

**3. Award and Implement the OATS Contract.**

The OATS program will provide an innovative procurement mechanism to standardize and modernize the office-based information technology and services throughout the Department of Transportation (**DOT**). Furthermore, OATS will enhance the Department's information-sharing capability beyond what is currently possible, producing as a result an environment in which procurement may be managed more easily. This solution involves a single contract for uniform hardware, software, interconnectivity, technical and support services, training, installation, and maintenance, available throughout the DOT.

**4. Issue for Coordination an Agency-wide Data Administration Program Plan.**

The ~~immense~~ tremendous and rapid increase in computing resources throughout the FAA has caused a proliferation of redundant and inconsistent data, to the point where it is expensive to collect and maintain the data. This situation complicates management's ability to make sound decisions based on reliable data. The AMS objective is to establish a comprehensive program plan for managing and administering FAA's vast data resources. Once accomplished, this agency-wide program will provide the strategic plan to better identify and manage these data resources.

**5. Develop an Agency-wide Local Area Network (LAN) Management Strategy.**

To better use the agency's electronic communications capability, a Headquarters networking Workgroup has been assembled to assist in developing an FAA-wide LAN strategy. This strategy, when completed, will identify

the requirements for the DOT/FAA Headquarters backbone network(s), develop the OATS network transition plans and the FTS-2000 transition plans, and develop and implement all networking standards and guidelines.

**6. Update FAA-wide Office Automation (OA) Plan.**

In order to effectively maintain the current data on the agency's OA requirements, AMS will update the FAA-wide Office Automation Plan to reflect any new or modified agency program office requirements. The updated Plan will also include some additional useful information.

**7. Update the ~~Information Resources Management Plan, Volume I: Strategic Overview.~~**

AMS is planning a comprehensive revision of the Information Management Plan (IRMP): ~~Volume I~~ for this fiscal year. The revised IRMP will fully, clearly, and succinctly reflect the FAA's overall strategic plan for information resources management (IRM). Essentially, the plan will document a vision of the future for IRM at the FAA.

**8. Restructure Database of information Resources Management Plan.**

Restructuring the Information Resources Management Plan (IRMP) database is a major objective of AMS for this fiscal year. The restructured database will include, in addition to both the planned and existing automated systems, the data elements for agency budget and OMB reporting requirements.

**9. Issue a Directive on Data Administration Standards.**

To exploit the potential of a highly-integrated management information environment, AMS plans to issue an agency directive focusing on data administration standards. This project will establish a framework for managing data as a resource, and will include information architecture, methods, techniques, procedures, and practices.

**10. Issue a Database Management Systems Order.**

In a related action, the Office will also issue an agency directive containing detailed guidance and instructions governing the selection of the database management systems that operate on the agency's Data General computers.

**11. Issue a Records Management User's Guide.**

This guide will contain procedures for effective records creation, disposition, and transfer; records cleanout; standard office management; correspondence creation and control; and electronic recordkeeping practices. This guide will be used as a standardized and effective tool for managing a total office management environment.

**12. Develop an FAA Directory Management Information System.**

This project will identify, analyze, and recommend enhancements to improve the FAA Directory Management Information System. The primary users — agency program managers and staff personnel — access the system to obtain various types of information including names, addresses, phone numbers, locations, field offices, and facilities.

**13. Install an Executive Information System for the Administrator's Management Team.**

The Executive Information System will provide executives an access to summary-level, on-line data from a broad range of information **areas** such as: Aviation Safety, Financial Resources, Human Resources, and National Airspace. Executives use this data for overall planning and control, current and projected performance monitoring, target setting, and status tracking.

**14. Assist and Support Activities involving Total Quality Management.**

AMS will serve as a focal point on agency-wide Total Quality Management (TQM) issues and activities. The **Office** will initiate and coordinate all TQM briefings and training sessions for requesting agency program **offices**, establish an information center on available TQM information and services, and publicize quality and productivity achievements through various mediums (like newsletters) to headquarters, regions, and centers.

**13. Install an Executive Information System for the Administrator's Management Team.**

The Executive Information System will provide executives an access to summary-level, on-line data from a broad range of information **areas** such as: Aviation Safety, Financial Resources, Human Resources, and National Airspace. Executives use this data for overall planning and control, current and projected performance monitoring, target setting, and status tracking.

**14. Assist and Support Activities involving Total Quality Management.**

AMS will serve as a focal point on agency-wide Total Quality Management (TQM) issues and activities. The **Office** will initiate and coordinate all TQM briefings and training sessions for requesting agency program **offices**, establish an information center on available TQM information and services, and publicize quality and productivity achievements through various mediums (like newsletters) to headquarters, regions, and centers.

## 3.0 AIRPORTS INFORMATION AREA

Traditional Airports Program functions include: airport capacity, national au-port planning, administration of airport grant programs, airport safety certifications, collection and maintenance of airport facility data, development of airport standards, management of airport environmental and social requirements, management of the compliance program, airspace reviews, management of relocation assistance programs, airport related property programs, and management of several other safety related programs.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to require the annual funding levels shown below. Funding requirements for the total five-year period are \$4382.6 thousand.

BUDGET CATEGORY	<del>FY89</del>	Em	<del>FY91</del>	Em	<del>FY93</del>
CAPITAL INVESTMENTS	450.0	330.0	900.0	600.0	0.0
FAA PERSONNEL COSTS	58.4	34.0	0.0	0.0	0.0
SERVICES (Commercial & Other Govt)	855.0	525.0	625.0	0.0	0.0
OTHER COSTS	<u>0.0</u>	<u>5.2</u>	<u>0.0</u>	<u>0.0</u>	<u>0.0</u>
TOTAL (\$000)	1363.4	894.2	1525.0	600.0	<u>0.0</u>

### INFORMATION RESOURCES DEVELOPMENT PROJECTS

Presented below and on the next page is a list summarizing the development projects associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. Figures shown in the *Total Cost* column include costs outside the five-year **FY89-FY93** time frame. More detailed information, such as the responsible organization, milestones, and cost breakdowns, may be found in the *Project Summaries* which follow.

## 5.0 AVIATION ACTIVITY INFORMATION AREA

The Aviation Activity Information Area represents the collection and dissemination of management and statistical (non-operational) information for use by managers and analysts. This information is used to support forecasting and a broad range of ad hoc or one-time analyses or parametric models. Examples include cost benefit analyses, regulatory analyses, overtime and pay studies. The information plays an integral part in each of the agency's functions and is required to develop, support, and coordinate most programs and plans of the agency.

Activity information in today's environment may be viewed as consisting of two broad areas: an activity and environment area and an agency operations area. The activity and environment area consists of data from external sources and measures the size of aviation in the country. Information in the agency operations area comes from internal FAA sources and is administrative in nature.

At the time of this publication, no development projects are being conducted in this information area. No cost figures or funding requirements, therefore, exist, nor ~~are~~ they needed.

## 6.0 AVIATION SAFETY ANALYSIS SYSTEM (ASAS) INFORMATION AREA

The Federal Aviation Act of 1958 requires that the FAA certificate aircraft, airmen, air carriers, other operators, and air agencies. The Act also requires that the FAA perform surveillance and enforce the adherence to the Federal Aviation Regulations to promote effective and safe aviation. These are the responsibilities of the Regulatory Standards and Compliance organization and its components, including the Office of Rulemaking, Civil Aviation Security, Accident Investigation, Aviation Medicine, Program and Resource Management, the Flight Standards Service, the Aircraft Certification Service, and the Aviation Standards National Field Office.

The Regulatory Standards and Compliance organization initiated the development of the Aviation Safety Analysis System (ASAS) in 1982 to provide an effective and timely mechanism for the collection, storage, dissemination, and analysis of all AXR mission related information. Its basic design philosophy is to integrate safety related information into a corporate data structure, provide source level information capture and dissemination through user-friendly information systems, and to provide managers with the tools and information necessary to improve both aviation safety and management functions. Extensive help functions and local data editing will be provided in order to improve the accuracy and completeness of the entered information. The ADTN telecommunications network links field offices with regional and national FAA information processing facilities. This approach is intended to provide field personnel and other agency organizational elements with improved access to more reliable and timely safety related information and with the capability to conduct a more effective analysis of potential safety issues.

Note that funding estimates are subject to revision as the Agency budgets are revised and reconciled.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to require the annual funding levels shown below. Funding requirements for the total five-year period are \$123,869.0 thousand.

BUDGET CATEGORY	FY89	FY90	FY91	FY92	FY93
CAPITAL INVESTMENTS	748.0	2040.0	14824.0	19844.0	14040.0
FAA PERSONNEL COSTS	1126.0	1350.0	1417.0	1224.0	1273.0
SERVICES (Contract & Other)	9593.0	14133.0	37618.0	34547.0	39240.0
OTHER COSTS	183.0	237.0	244.0	94.0	94.0
TOTAL (\$000)	11650.0	17760.0	54103.0	55709.0	544547.0

## 6.0 AVIATION SAFETY ANALYSIS SYSTEM (ASAS) INFORMATION AREA

The Federal Aviation Act of 1958 requires that the FAA certificate aircraft, airmen, air carriers, other operators, and air agencies. The Act also requires that the FAA perform surveillance and enforce the adherence to the Federal Aviation Regulations to promote effective and safe aviation. These are the responsibilities of the Regulatory Standards and Compliance organization and its components, including the Office of Rulemaking, Civil Aviation Security, Accident Investigation, Aviation Medicine, Program and Resource Management, the Flight Standards Service, the Aircraft Certification Service, and the Aviation Standards National Field Office.

The Regulatory Standards and Compliance organization initiated the development of the Aviation Safety Analysis System (ASAS) in 1982 to provide an effective and timely mechanism for the collection, storage, dissemination, and analysis of all AXR mission related information. Its basic design philosophy is to integrate safety related information into a corporate data structure, provide source level information capture and dissemination through user-friendly information systems, and to provide managers with the tools and information necessary to improve both aviation safety and management functions. Extensive help functions and local data editing will be provided in order to improve the accuracy and completeness of the entered information. The ADTN telecommunications network links field offices with regional and national FAA information processing facilities. Note that funding estimates are subject to revision as the Agency budgets are revised and reconciled.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to **require** the annual funding levels shown below. Funding requirements for the total five-year period are \$193,869.0 thousand.

BUDGET CATEGORY	FY89	FY90	FY91	FY92	FY93
CAPITAL INVESTMENTS	748.0	2040.0	14824.0	19844.0	14040.0
FAA PERSONNEL COSTS	1126.0	1350.0	1417.0	1224.0	1273.0
SERVICES (Contract & Other)	9593.0	14133.0	37618.0	34547.0	39240.0
OTHER COSTS	183.0	237.0	244.0	94.0	94.0
TOTAL (\$000)	11650.0	17760.0	54103.0	55709.0	544547.0

FAA **FY89** Objectives Supported:

**AVIATION SAFETY:**

- 13 Implement an air carrier self-evaluation safety program. Develop the regulatory framework for carriers to “certify” their compliance with the Federal Aviation Regulations.
- 14 Conduct at least four (4) safety and efficiency reviews and meet 80% of the corrective action milestones.
- 15 Review the **certificated** airman training program and begin implementing recommendations.
- 16 Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% from the **FY88** base.
- 17 Develop and initiate a comprehensive human factors program for pilots and controllers.
- 18 Establish a comprehensive timetable for the implementation of the recommendations of the recent International Conference on Aging Airplanes.
- 19 Decrease operational errors by 5% from the FY88 base.

**HUMAN RELATIONS:**

- 7 1 Emphasize professionalism and pride in the FAA work force and increase its involvement in decision-making by taking positive action at all levels of the agency in response to the SFA and by developing a succession plan for career leadership positions.

## 7.0 FINANCIAL RESOURCES INFORMATION AREA

## 7.0 FINANCIAL RESOURCES INFORMATION AREA

## 7.0 FINANCIAL RESOURCES INFORMATION AREA

The Financial Resources Information Area provides information to **three** groups: the general public, agencies external to the FAA, and internal agency management. Financial information is composed of four distinct activities: budget management, financial accounting, payroll, and other fiscal processes.

Until 1979, the Financial Resources Information Area was characterized by decentralization of systems, heavy reliance on manual processes, and duplicate entry of common transactions into a variety of independent and specialized subsystems.

Since then, there have been major automated systems introduced with implementation taking place at this time. The FAA Uniform Accounting System has been adopted by the Department of Transportation as the model system to be used agency-wide. The Office of Budget has begun implementation of a Budget Information System that will incorporate information from the agency's accounting, payroll, and personnel systems, as well as including agency financial plans. The integration of key data from these various systems will provide a central repository of information that will be available to members of the FAA budget community.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to require the annual funding levels shown below. Funding requirements for the total five-year period are **\$3,174.2** thousand.

BUDGET CATEGORY	FY 1989	FY 1990	FY 1991	FY 1992	FY 1993
CAPITAL INVESTMENTS	213.0	435.0	25.0	0.0	0.0
FAA PERSONNEL COSTS	280.0	240.0	10.0	0.0	0.0
SERVICES (Commercial & Other Govt)	875.0	799.2	225.0	0.0	0.0
OTHER COSTS	37.5	28.0	65.5	0.0	0.0
TOTAL (\$000)	1405.5	1502.2	266.5	0.0	0.0

### INFORMATION RESOURCES DEVELOPMENT PROJECTS

Presented on the following page is a list summarizing the development projects associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. Figures shown in the *Total Cost* column include costs outside the five-year **FY89-FY93** time frame. More detailed information, such as the responsible organization, milestones, and cost breakdowns, may be found in *the Project Summaries* which follow.

## DEVELOPMENT PROJECTS LIST

Project Number	Project Title	Schedule Start/Complete	Total Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
010701	Permanent Change of Station Tax System	APR-89 SEP-90	66.2	5	2.6	63
010708	Budget Information System	MAR-83 SEP-90	3725.0	5	4	63
230701	Research, Engineering, and Development Monitoring, Analysis, and Control System (REDMACS)	FEB-89 MAR-91	1360.0	1,25	1,34	33,68
<b>TOTAL</b>			<b>5144.2</b>			

### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 5 Effkient and economical program administration.

### FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.

### FAA **FY89** Objectives Supported:

#### **THE NAS PLAN:**

- 33 Publish a Research, Engineering, and Development **(R,E,&D)** Plan.

#### **MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

## 8.0 HUMAN RESOURCES INFORMATION AREA

Human Resources information is now produced and managed at a variety of levels within the FAA. Automated and manual systems deal with employment, civil rights and equal employment opportunity, health and safety, pay and position management, training, and labor relations functional activities. Many of these systems are, or are being, automated. All share resources and interface with other systems. This will result in reduced duplication of effort and increased productivity.

Human Resources information resource management goals address the capability of a group of inter-related systems sharing hardware, software, telecommunications, and common data elements.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to require the annual funding levels shown below. Funding requirements for the **total** five-year period are **\$6,891.8** thousand.

<b>BUDGET CATEGORY</b>	<b>FY89</b>	<b>FY90</b>	<b>FY91</b>	<b>Em</b>	<b>FY93</b>
CAPITAL INVESTMENTS	412.6	333.1	185.0	50.0	<b>50.0</b>

## 9.0 MATERIEL RESOURCES INFORMATION AREA

## 9.0 MATERIEL RESOURCES INFORMATION AREA

## 9.0 MATERIEL RESOURCES INFORMATION AREA

The primary purpose of Materiel Resources is to provide the time and place utility for the equipment, real estate and space, spare/repair parts, supplies, and supporting services needed to establish, operate, manage, maintain, and eventually dispose of NAS facilities and agency aircraft. Materiel Resources is an area that operated in an environment of extensive and often antiquated laws and regulations and a high vulnerability to waste, mismanagement, fraud, and abuse. This program is responsible for the management and control of agency assets valued at nearly three billion dollars.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects **are** estimated to require the annual funding levels shown below. Funding requirements for the total five-year period are **\$13,846.4** thousand. - -

<b>BUDGET CATEGORY</b>	<b>FY89</b>	<b>FY90</b>	<b>FY91</b>	<b>FY92</b>	<b>FY93</b>	<b>E m</b>
CAPITAL INVESTMENTS	350.0	150.0	150.0	50.0	50.0	50.0
FAA PERSONNEL COSTS	1714.9	1771.3	1879.2	179.0	150.0	150.0
SERVICES (Commodities & Other Govt)	2887.0	2466.0	1462.0	192.0	170.0	170.0
OTHER COSTS	75.0	75.0	75.0	0.0	0.0	0.0
TOTAL (\$000)	5026.9	4462.3	3566.2	421.0	370.0	370.0

### INFORMATION RESOURCES DEVELOPMENT PROJECTS

Presented on the following page is a list summarizing the development projects associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. Figures shown in the *Total Cost* column include costs outside the five-year **FY89-FY93** time frame. More detailed information, such as the responsible organization, milestones, and cost breakdowns, may be found in the *Project Summaries* which follow.

## DEVELOPMENT PROJECTS LIST

Project Number	Project Title	Schedule Start/Complete	Total Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
010907	Personal Property In-Use Management System III	JAN-65	1629.0	5	3,6	63
010910	System of Acquisition Management	JAN-84 JUN-83	3680.6 m.6	5	4,6	63
100806	Logistics and Inventory System (LIS)	NOV-82 NOV-81	24731.8	1,234,5	12,34,5,7	63
130912	Technical Center Logistics Information System	AUG-83 DEC-89	1660.0	1,5	3,4	63
<b>TOTAL</b>			31B01.4			

### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad.
- 4 Fulfillment of national defense requirements.
- 5 Efficient and economical program administration.

### FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA pre-eminence in the world aviation community.

### FAA Objectives Supported:

#### MANAGEMENT/COMMUNICATION:

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

## 10.0 NATIONAL AIRSPACE SYSTEM (NAS) FACILITIES INFORMATION AREA

The Associate Administrator for Airways Facilities (AAF), supporting and working with the Airway Facilities (AF) Division of FAA regions, has responsibility for maintaining airway facilities and developing major improvements in the National Airspace System (NAS) in accordance with the NAS Plan. The major functions of AF include: maintaining and operating over 20,000 NAS facilities and related equipment; conducting R&D programs in excess of \$300 million annually to support the NAS modernization; implementing Facilities and Equipment (F&E) programs using one billion dollars annually in accordance with the NAS Plan; providing technical and engineering support; and managing and administering AF organizations consisting of over 12,000 employees and several hundred contracts.

The NAS Management Automation Program (NASMAP) calls for the development and implementation of a single information system which, through several phases, will evolve into an efficient, cost-effective, and comprehensive technical and administrative network.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to require the annual funding levels shown below. Funding requirements for the total five-year period are \$8400.0 thousand.

<u>BUDGET CATEGORY</u>	<u>FY89</u>	<u>FY90</u>	<u>FY91</u>	<u>FY92</u>	<u>FY93</u>
CAPITAL INVESTMENTS	0.0	600.0	500.0	0.0	0.0

FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad.
- 4 ~~Fulfillment~~ of national defense requirements.
- 5 Efficient and economical program administration.

**FAA Goals Supported:**

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA **pre-eminence** in the world aviation community.

**FM FY89 Objectives Supported:**

**~~CAPACITY:~~**

- 23 Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.

**THE NAS PLAN:**

- 32 Maintain the thrust of the National Airspace System Plan and achieve 90% of the published milestones, as reflected in the FY89 schedule.
- 33 Publish a Research, Engineering, and Development (**R,E,&D**) Plan.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION:**

- 42 Expand the Minnesota "**partnership**" **example** of working closely with state governments to coordinate research programs, aviation career education and training programs, and airport and general aviation planning.

**FAA TRAINING:**

- 51 Update FAA training to meet 1990's technologies by establishing a new office of training and higher education, by conducting three prototype projects in conjunction with universities and industry, and by hosting two symposia on FAA job-related training.

**MANAGEMENT/COMMUNICATION:**

- 61 Issue the operating procedures to **further** implement straight-line management.
- 62 Increase the use of video conferencing to improve agency-wide communications.
- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

**HUMAN RELATIONS:**

- 71 Emphasize professionalism and pride in the FAA work force and increase its involvement in decision-making by taking positive action at all levels of the agency in response to the SFA and by developing a succession plan for career leadership positions.
- 73 Improve recruitment of the FAA work force by shortening the hiring process for ATC **specialists** by at least two-thirds, by meeting the FY89 work force targets, and by developing an alternative compensation program for all safety-related occupations.

**FAA Goals Supported:**

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA **pre-eminence** in the world aviation community.

**FM FY89 Objectives Supported:**

**~~CAPACITY:~~**

- 23 Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.

**THE NAS PLAN:**

- 32 Maintain the thrust of the National Airspace System Plan and achieve 90% of the published milestones, as reflected in the FY89 schedule.
- 33 Publish a Research, Engineering, and Development (**R,E,&D**) Plan.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION:**

- 42 Expand the Minnesota "**partnership**" **example** of working closely with state governments to coordinate research programs, aviation career education and training programs, and airport and general aviation planning.

**FAA TRAINING:**

- 51 Update FAA training to meet 1990's technologies by establishing a new office of training and higher education, by conducting three prototype projects in conjunction with universities and industry, and by hosting two symposia on FAA job-related training.

## **12.0 INFORMATION PROCESSING AND SUPPORT INFORMATION AREA**

## DEVELOPMENT PROJECTS LIST

Project Number	Project Title	Schedule Start/ Complete	Total Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
011201	FAAMIS - Operational Management Information System (OMIS)	MAR86 DEC-92	2440.0	5	246	63
011212	Computer Resources Nucleus (CORN)	JAN-87 SEP-92	152496.3	5	23	63
TOTAL			154836.3			

### FAA Missions Supported:

5 Efficient and economical program administration.

### FAA Goals Supported:

- 2 Build an FAA **culture** which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.

### FAA N89 Objectives Supported:

#### MANAGEMENT/COMMUNICATION:

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

## FAAMIS - OPERATIONAL MANAGEMENT INFORMATION SYSTEM (OMIS)

Project No.: 011201

**Purpose:**

Provide a single integrated source for management information commonly required by all agency managers, eliminating the need for redundant systems.

## 13.0 HUMAN INTERFACE AND TRAINING

### INFORMATION AREA

## 13.0 HUMAN INTERFACE AND TRAINING

### INFORMATION AREA

## 13.0 HUMAN INTERFACE AND TRAINING INFORMATION AREA

The preceding Information Area descriptions represent change in the work environment of every employee — managers and their co-workers. The automation efforts outlined in the plan will bring automation to practically all parts of the agency. In the future, the management and administrative operations of the FAA will be modernized in parallel with the NAS **modernization** program. Much of the management modernization is needed to support the NAS modernization as well as to increase the productivity of other operations.

It is anticipated that virtually every FAA employee will be working with a computer or through terminals in the next ten years. Microcomputers, terminals of various types, printers, and telecommunications devices will become a part of almost every **office** and manned facility. The ability to use these devices will be an important element in each employee's continued productivity.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to require the annual funding levels shown below. Funding requirements for the total five-year period are \$0.0.

<b>BUDGET CATEGORY</b>	<b>FY89</b>	<b>FY90</b>	<b>FY91</b>	<b>FY92</b>	<b>FY93</b>
CAPITAL INVESTMENTS	0.0	0.0	0.0	0.0	0.0
FAA PERSONNEL COSTS	0.0	0.0	0.0	0.0	0.0
SERVICES (Commercial & Other Govt.)	0.0	0.0	0.0	0.0	0.0
OTHER COSTS	0.0	0.0	0.0	0.0	0.0
<b>TOTAL (\$000)</b>	<b>0.0</b>	<b>0.0</b>	<b>0.0</b>	<b>0.0</b>	<b>0.0</b>

### INFORMATION RESOURCES DEVELOPMENT PROJECTS

Presented on the next page is a list summarizing the development projects associated with this information area. The list identifies the FAA **agency-**level missions, FAA goals, and **FY89** objectives supported by each project. Figures shown in the **Total** Cost column include costs outside the five-year **FY89-FY93** time frame. More detailed information, such as the responsible organization, milestones, and cost breakdowns, may be found in *the Project Summaries* which follow.

## 13.0 HUMAN INTERFACE AND TRAINING INFORMATION AREA

The preceding Information Area descriptions represent change in the work environment of every employee — managers and their co-workers. The automation efforts outlined in the plan will bring automation to practically all parts of the agency. In the future, the management and administrative operations of the FAA will be modernized in parallel with the NAS **modernization** program. Much of the management modernization is needed to support the NAS modernization as well as to increase the productivity of other operations.

It is anticipated that virtually every FAA employee will be working with a computer or through terminals in the next ten years. Microcomputers, terminals of various types, printers, and telecommunications devices will become a part of almost every **office** and manned facility. The ability to use these devices will be an important element in each employee's continued productivity.

### INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to require the annual funding levels shown below. Funding requirements for the total five-year period are \$0.0.

<b>BUDGET CATEGORY</b>	<b>FY89</b>	<b>FY90</b>	<b>FY91</b>	<b>FY92</b>	<b>FY93</b>
CAPITAL INVESTMENTS	0.0	0.0	0.0	0.0	0.0
FAA PERSONNEL COSTS	0.0	0.0	0.0	0.0	0.0
SERVICES (Commercial & Other Govt.)	0.0	0.0	0.0	0.0	0.0
OTHER COSTS	0.0	0.0	0.0	0.0	0.0
<b>TOTAL (\$000)</b>	<b>0.0</b>	<b>0.0</b>	<b>0.0</b>	<b>0.0</b>	<b>0.0</b>

### INFORMATION RESOURCES DEVELOPMENT PROJECTS

Presented on the next page is a list summarizing the development projects associated with this information area. The list identifies the FAA **agency-**level missions, FAA goals, and **FY89** objectives supported by each project. Figures shown in the **Total** Cost column include costs outside the five-year **FY89-FY93** time frame. More detailed information, such as the responsible organization, milestones, and cost breakdowns, may be found in *the Project Summaries* which follow.

FAA Goals Supported:

- 3 Develop, **refine** and implement FAA programs and long-range plans.
- 7 Promote USA/FAA pre-eminence in the world aviation community.

FAA **FY89** Objectives Supported:

**MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, **programs** within each organization that place a special emphasis on reducing the administrative time needed to **Respond** to internal and external requests.

## 15.0 RECORDS MANAGEMENT

### INFORMATION AREA

## 15.0 RECORDS MANAGEMENT

### INFORMATION AREA

# 15.0 RECORDS MANAGEMENT INFORMATION AREA

Records Management should really be called Information Management. The creation, maintenance, use, and disposition of information is a record-keeping function. Official records, regardless of their physical form, are controlled by the provisions of 44 U.S.C., Chapters 21, 29, 31, and 33. The Paperwork Reduction Act of 1980 (Public Law 96-511) recognized the concept of information resources management as a basis for managing Federal information and all other information processing assets. The Office of Management and Budget (OMB) Circular A-130, *Management of Federal Information Resources*, set forth the policies for the management of Federal information assets.

Record-keeping systems, whether paper or electronic, contain records management, information resource management, security, and privacy act requirements and should be managed according to the following life-cycle approach:

1. Creation,
2. Maintenance and Use, and
3. Disposition.

An electronic record-keeping system is **defined** as the operation of records systems in which a computer is required for a user to create, work with, or delete records. Examples of electronic records are those residing on magnetic tapes, disks, and drums, on video or audio files, and on optical disks.

All personnel should be aware of and practice good records management principles in every aspect of the work environment. Information created by or contained in correspondence, mail, micrographics, directives, forms, printing, publications, reports, files, vital records, drawings, spreadsheets, word-processing, databases, etc., should conform to established records management, information resource management, security, and privacy act requirements.

## INFORMATION RESOURCES DEVELOPMENT COSTS

Costs for planned development projects are estimated to ~~require~~ the annual funding levels shown below. Funding requirements for the total five-year period are **\$835.0** thousand.

<b>BUDGET CATEGORY</b>	<b>EY89</b>	<b>EY90</b>	<b>EY91</b>	<b>EY92</b>	<b>EY93</b>
CAPITAL INVESTMENTS	0.0	200.0	250.0	40.0	40.0
FAA PERSONNEL COSTS	40.0	30.0	0.0	0.0	0.0
SERVICES (Commercial & Other Cont.)	25.0	<del>100.0</del>	50.0	30.0	30.0
OTHER COSTS	0.0	0.0	0.0	0.0	0.0
<b>TOTAL (\$000)</b>	<b>65.0</b>	<b>330.0</b>	<b>300.0</b>	<b>70.0</b>	<b>70.0</b>

## INFORMATION RESOURCES

### DEVELOPMENT PROJECTS

Presented below is a list summarizing the development projects associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and FY89 objectives supported by each project. Figures shown *in the Total Cost* column include costs outside the five-year **FY89-FY93** time frame. More detailed information, such as the responsible organization, milestones, and cost breakdowns, may be found in the Project Summaries which follow.

#### DEVELOPMENT PROJECTS LIST

Project Number	Project Title	Schedule Start/Complete	Total Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
011503	Expansion of Electronic Publishing Capability	OCT-86 OCT-90	140.0	5	4	63
121501	Regional Budget Automation	DEC-86 DEC-89	211.0	5	2,46	63
161501	ANE-100 Files Automation	JUN-88 SEP-94	885.0	1,5	1,46	63
TOTAL			1236.0			

#### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 5 Efficient and economical program administration.

#### FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.

#### FAA **FY89** Objectives Supported:

##### MANAGEMENT/COMMUNICATION:

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

## 16.2 AIR TRAFFIC CONTROL (ATC) AND AIRSPACE INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAAgency-level missions, FAA goals, and FY89 objectives supported **by** each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
020411	Aeronautical Information System	1095.0	<del>1,234</del> 5	<del>1,345</del> 7	63
020412	Air Traffic Operations Service Publication System	375.0	<del>1,234</del> 5	<del>1,345</del> 7	63
020413	Airspace Rules Processing And Reporting System (ARRRS)	117.0	1,2	<del>1,345</del> 7	63
020414	Air Traffic Rules Information Processing Systems (AIRTRIPS)	150.0	<del>1,24</del>	<del>1,345</del>	53
090485	Aircraft Management Information System (AMIS)	946.0	<del>1,234</del> 5	<del>1,456</del> 7	16
120409	Air Traffic Count System	27.0	1,25	1,6	53
140401	Air Traffic Performance Indicators	11.3	2	4	63
140402	Air Traffic Statistical Reporting	11.3	2	4	53
140414	Fuel/Sum Model	12.0	1,24	4	53
180401	Traffic Count	16.0	5	<del>3,4,7</del>	21,22,71
180401	Air Traffic Count Data	4.5	1,25	6	<del>18,22,32,42,63,73</del>
190402	Air Traffic Density	5.0	1,25	6	16,21,32,42,73
190407	Obstruction, Evaluation, and Airport Airspace Analysis	175.0	1,25		16,21,22,23,31,32,42,63,71
TOTAL			204511		

#### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad
- 4 Fulfillment of national defense requirements.
- 5 Efficient and economical program administration.

#### FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA **pre-eminence** in the world aviation community.

FAA ~~FY89~~ Objectives Supported:

**AVIATION SAFETY:**

- 16 Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% **from** the FY88 base.
- 19 Decrease operational errors by 5% from the **FY88** base.

**CAPACITY:**

- 21 Expand the use of the National Airspace System Performance Analysis Capability (NASPAC) to plan for the needed NAS capacity enhancements.
- 22 Increase en route airspace capacity by establishing multiple routes between congested terminal areas. **Improve** the NAS system performance by reducing daily delays of 15 minutes or more by 5% from the **FY88** base.
- 23 Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.

**THE NAS PLAN:**

- 31 Complete the Microwave Landing System acceptance testing, and commission the first site.
- 32 Maintain the thrust of the National Airspace System Plan and achieve 90% of the published milestones, as reflected in the **FY89** schedule.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION:**

- 42 Expand the Minnesota “partnership\*” example of working closely with state governments to coordinate research programs, aviation career education and training programs, and airport and general aviation planning.

**MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

**HUMAN RELATIONS:**

- 71 Emphasize professionalism and pride in the FAA work force and increase its involvement in decision-making by taking positive action at all levels of the agency in response to the SFA and by developing a succession plan for career leadership positions.
- 73 Improve recruitment of the FAA work force by shortening the hiring process for ATC specialists by at least **two-thirds**, by meeting the **FY89** work force targets, and by developing an alternative compensation program for all safety-related occupations.

FAA ~~FY89~~ Objectives Supported:

**AVIATION SAFETY:**

- 16 Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% **from** the FY88 base.
- 19 Decrease operational errors by 5% from the **FY88** base.

**CAPACITY:**

- 21 Expand the use of the National Airspace System Performance Analysis Capability (NASPAC) to plan for the needed NAS capacity enhancements.
- 22 Increase en route airspace capacity by establishing multiple routes between congested terminal areas. **Improve** the NAS system performance by reducing daily delays of 15 minutes or more by 5% from the **FY88** base.
- 23 Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.

**THE NAS PLAN:**

- 31 Complete the Microwave Landing System acceptance testing, and commission the first site.
- 32 Maintain the thrust of the National Airspace System Plan and achieve 90% of the published milestones, as reflected in the **FY89** schedule.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION:**

- 42 Expand the Minnesota “partnership\*” example of working closely with state governments to coordinate research programs, aviation career education and training programs, and airport and general aviation planning.

**MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

**HUMAN RELATIONS:**

- 71 Emphasize professionalism and pride in the FAA work force and increase its involvement in decision-making by taking positive action at all levels of the agency in response to the SFA and by developing a succession plan for career leadership positions.
- 73 Improve recruitment of the FAA work force by shortening the hiring process for ATC specialists by at least **two-thirds**, by meeting the **FY89** work force targets, and by developing an alternative compensation program for all safety-related occupations.

AIRSPACE RULES PROCESSING AND REPORTING SYSTEM (ARPRS)	
System No.: 020413	
<b>Description:</b> Contains the airspace descriptions, history, etc. of all airspace descriptions carried under parts 71, 73, and 75 of the Code of Federal Regulations. This system supports Headquarters AAT.	<b>IRMP Information Area:</b> Air Traffic Control (ATC) and Airspace
	Responsible Organization: ATO
	System Owner: AAT
	Software Owner: AAT
	Implementation Date: 07/07/1982
Network:	Annual Operating Cost (\$900): 117.0
Hardware: Wang VS1 OOA	Software: COBOL
System Users:	
AIR TRAFFIC RULES INFORMATION PROCESSING SYSTEMS (AIRTRIPS)	
System No.: 020414	
<b>Description:</b> Contains statute description and historical data for petitions, exemptions, and rulemaking actions associated with select sections of Federal Aviation Regulations.	<b>IRMP Information Area:</b> Air Traffic Control (ATC) and Airspace
	Responsible Organization: ATO
	System Owner: AAT
	Software Owner: AAT
	Implementation Date: 09/01/1983
Network:	Annual Operating Costs (\$900): 150.0
Hardware: Wang VS1 OOE	Software: COBOL
System Users:	

AIRSPACE RULES PROCESSING AND REPORTING SYSTEM (ARPRS)	
System No.: 020413	
<b>Description:</b> Contains the airspace descriptions, history, etc. of all airspace descriptions carried under parts <b>71, 73,</b> and 75 of the Code of Federal Regulations. This system supports Headquarters <b>AAT</b> .	<b>IRMP Information Area:</b> Air Traffic Control (ATC) and Airspace
	Responsible <b>Organization:</b> <b>A T O</b>
	System Owner: <b>AAT</b>
	Software Owner: <b>AAT</b>
	Implementation Date: <b>07/07/1982</b>
Network:	Annual Operating <b>Costs</b> (\$000): 117.0
Hardware: Wang <b>VSI</b> OOA	Software: COBOL
System Users:	

AIR TRAFFIC RULES INFORMATION PROCESSING SYSTEMS (AIRTRIPS)	
System No.: <del>020413</del> <b>020414</b>	
<b>Description:</b> Contains statute description and historical data for <del>petitions</del> , exemptions, and rulemaking actions <del>as associated</del> with select sections of Federal Aviation <del>Regulations</del> .	<b>IRMP Information Area:</b> Air Traffic Control (ATC) and Airspace
	Responsible <b>Organization:</b> <b>A T O</b>
	System Owner: <b>AAT</b>
	Software Owner: <b>AAT</b>
	<del>Implementation</del> Date: <b>09/01/1983</b>
Network:	Annual Operating Coats (\$000): 150.0
Hardware: Wang <b>VSI</b> OOE	Software: COBOL
System Users:	

<b>AIR TRAFFIC PERFORMANCE INDICATORS</b>		System No.: 140401
<b>Description:</b> Produces statistical reports for analysis concerning <b>Costs</b> Of aircraft handled. Supports AEA-1 and AEA-500.	<b>IRMP Information Area:</b>	
	Air Traffic Control (ATC) and Airspace	
	Responsible Organization: <b>AEA-540</b>	
	System Owner: <b>AEA-540</b>	
	Software Owner: <b>AEA-43</b>	
	Implementation Date: <b>10/15/1981</b>	
<b>Network:</b>	Annual Operating Costa (\$000): 11.:	
<b>Hardware:</b> DG MV/15000	<b>Software:</b> COBOL	
<b>System Users:</b>		
<b>AIR TRAFFIC STATISTICAL REPORTING</b>		System No.: <b>140402</b>
<b>Description:</b> Provides reports reflecting summary data on aircraft handled at terminal, en route and at Flight Service facilities. Supports AEA-200, <b>AEA-400</b> , AEA-500, and AEA-600.	<b>IRMP Information Area:</b>	
	Air Traffic Control (ATC) and Airspace	
	Responsible Organization: <b>AEA-540</b>	
	System Owner: <b>AEA-540</b>	
	Software Owner: <b>AEA-43</b>	
	Implementation Date: <b>10/15/1972</b>	
<b>Network:</b>	Annual Operating <b>Costa</b> (\$000): 11.3	
<b>Hardware:</b> DG MV/II 5000	<b>Software:</b> COBOL	
<b>System Users:</b>		

FUEUBURN MODEL		System No.: 140414
<b>Description:</b> Estimates fuel consumption of commercial jet aircraft from path profile data. Supports AEA-500.	<b>IRMP</b> Information Area:	
	Air Traffic Control (ATC) and Airspace	
	Responsible Organization:	AEA-530
	System Owner:	AEA-530
	Software Owner:	AEA-530
	Implementation Date:	04/10/1980
<b>Network:</b>	Annual Operating Costs (\$000):	12.0
Hardware: BM PC	Software: BASIC	
<b>System</b> Users:		
TRAFFIC COUNT		System No.: 180401
<b>Description:</b> gathers air traffic count data. Monitors the automation of air traffic activity including centers, terminals, and stations.	<b>IRMP</b> Information Area:	
	Air Traffic Control (ATC) and Airspace	
	Responsible Organization:	ASO
	System Owner:	ASO
	Software Owner:	ASO
	Implementation Date:	12/07/1979
<b>Network:</b>	Annual Operating Costs (\$000):	16.0
Hardware: DG MV8000	Software: COBOL	
<b>System</b> Users:		

FUEUBURN MODEL		System No.: 140414
<b>Description:</b> Estimates fuel consumption of commercial jet aircraft from path profile data. Supports AEA-500.	<b>IRMP Information</b> Area:	
	Air Traffic Control (ATC) and Airspace	
	Responsible Organization:	AEA-530
	System Owner:	AEA-530
	Software Owner:	AEA-530
	Implementation Date:	04/10/1980
<b>Network:</b>	Annual Operating Costs (\$000):	12.0
Hardware: BM PC	Software: BASIC	
<b>System</b> Users:		
TRAFFIC COUNT		System No.: 180401
<b>Description:</b> gathers air traffic count data. Monitors the automation of air traffic activity including centers, terminals, and stations.	<b>IRMP Information</b> Area:	
	Air Traffic Control (ATC) and Airspace	
	Responsible Organization:	ASO
	System Owner:	ASO

	<b>Implementation Date:</b> <b>09/01/1985</b>
<b>Network:</b> PC-LAN	<b>Annual Operating Costs (\$000):</b> 175.0
<b>Hardware:</b> DG MV15000 Compaq 286	<b>Software:</b> FORTRAN F77 COBOL XODIAC SmartTerm 400
<b>System Users:</b>	

## 16.3 AVIATION ACTIVITY INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and FY89 objectives supported **by** each project. More detailed information may be found in the individual *Fact Sheets* which follow,

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
<del>010509</del> 010509	Aircraft Statistical System	45.1	<del>1,2,3,4,5</del> 1,2,3,4,5	<del>1,3,4,7</del> 1,3,4,7	53
<del>010510</del> 010510	Air Carrier Activity Information System	151.4	<del>1,2,3,4,5</del> 1,2,3,4,5	<del>1,3,4,7</del> 1,3,4,7	<del>63</del> 63
010511	General Aviation Activity and Avionics Survey System	400.8	<del>1,2,3,5</del> 1,2,3,5	<del>1,3,4,7</del> 1,3,4,7	<del>63</del> 63
<del>100590</del> 100590	Aircraft Document Index System	<del>1103.4</del> 1103.4	5	1	<del>63</del> 63
<del>123503</del> 123503	Aircraft Management	1.5	<del>1,2,5</del> 1,2,5	<del>1,4</del> 1,4	<del>63</del> 63
TOTAL		702.2			

#### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad.
- 4 ~~Fulfillment~~ of national defense requirements.
- 5 Efficient and economical program administration.

#### FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- ~~7 Promote USA/FAA pre-eminence~~ in the world aviation community.

#### FAA ~~FY89~~ Objectives Supported:

##### ~~MANAGEMENT/COMMUNICATION:~~

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

AIRCRAFT STATISTICAL SYSTEM		
		System No.: <b>010509</b>
<b>Description:</b> Produces aircraft inventory statistics for analysis, based on an annual extract from the Aircraft Registration System.	<b>IRMP</b> Information Area:	
	Aviation Activity	
	<b>Responsible Organization:</b>	<b>AMS-42C)</b>
	<b>System Owner:</b>	<b>AMS-42C)</b>
	<b>Software Owner:</b>	<b>AAC-380</b>
	<b>Implementation Date:</b>	<b>01/01/1962</b>
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b>	45.11
<b>Hardware:</b> IBM 3084	<b>Software:</b> ADABAS COBOL EASYTRIEVE	
<b>System Users: AAC</b>		
<b>AIR CARRIER ACTIVITY INFORMATION SYSTEM</b>		
		System No.: <b>010510</b>
<b>Description:</b> Collects, maintains, and tabulates passenger enplanement data from commercial carriers. This data is used to distribute Airport and Airway Improvement Funds.	<b>IRMP</b> Information Area:	
	Aviation Activity	
	<b>Responsible Organization:</b>	<b>AMS-42C)</b>
	<b>System Owner:</b>	<b>AMS-42C)</b>
	<b>Software Owner:</b>	<b>AMS-42C)</b>
	<b>Implementation Date:</b>	<b>06/01/1971)</b>
<b>Network: ADTN</b>	<b>Annual Operating Costs (\$000):</b>	<b>15114</b>
<b>Hardware:</b> DEC System 10	<b>Software:</b> TOPS 10 OS System 1022 SCOPE 2 FORTRAN	
<b>System Users: AMS</b>

<b>System</b> Users:	

FAA **FY89** Objectives Supported:

**AVIATION SAFETY:**

- 11 Initiate a test of synthetic vision technology as a pilot aid for adverse weather conditions.
- 12 Implement an aeronautical satellite communications program to improve the safety and efficiency of transoceanic flight.
- 13 Implement an air carrier self-evaluation safety **program**. Develop the regulatory framework for carriers to **"certify"** their compliance with the Federal Aviation Regulations.
- 14 Conduct at least four (4) safety and efficiency reviews and meet 80% of the **corrective** action milestones.
- 15 Review the certificated airman training program and begin implementing recommendations.
- 16 Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% from the FY88 base.
- 17 Develop and initiate a comprehensive human factors **program** for pilots and controllers.
- 18 Establish a comprehensive timetable for the implementation of the recommendations of the recent International **Conference** on Aging Airplanes.
- 19 Decrease operational errors by 5% from the FY88 base.

**CAPACITY:**

- 23 Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.

**MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

INSTRUMENT APPROACH PROCEDURE <del>Automation</del> (IAPA)	
System No.: <del>090686</del>	
Description: Automates the instrument flight program to include the development, review, storage, and electronic transmittal of instrument approach procedures.	<b>IRMP</b> Information Area:
	Aviation Safety Analysis System ( <del>ASAS</del> )
	<del>Responsible</del> Organization: AVN
	System Owner: AVN
	Software <del>Owner</del> : AAC
	Implementation Date: 06/01/1978
Network:	Annual Operating Costs (\$000): 2533.0
Hardware: DG <del>MV18000</del> IBM 3084	Software: FORTRAN 77+
System Users:	

COMPREHENSIVE AIRMAN INFORMATION SYSTEM (CAIS)	
System No.: <del>100694</del>	
Description: Maintains a current database to support on-line <del>ac-</del> <b>cess</b> to airmen certification information. Batch mode provides reports, airmen directories, and <del>air-</del> men statistics.	<b>IRMP</b> Information Area:
	Aviation Safety Analysis System ( <del>ASAS</del> )
	Responsible Organization: AAC
	System Owner: AAC
	Software Owner: AAC
	Implementation Date: 07/01/1973
Network:	Annual Operating Costs ( <del>\$000</del> ): 600.7
Hardware: IBM 3084 Harris Display <del>Station</del>	Software: ADABAS Natural Intercomm
System Users:	

INSTRUMENT APPROACH PROCEDURE <del>Automation</del> (IAPA)	
System No.: <del>090686</del>	
Description: Automates the instrument flight program to include the development, review, storage, and electronic transmittal of instrument approach procedures.	<b>IRMP</b> Information Area:
	Aviation Safety Analysis System ( <del>ASAS</del> )
	<del>Responsible</del> Organization: AVN
	System Owner: AVN
	Software <del>Owner</del> : AAC
	Implementation Date: 06/01/1978
Network:	Annual Operating Costs (\$000): 2533.0
Hardware: DG <del>MV18000</del> IBM 3084	Software: FORTRAN 77+
System Users:	

COMPREHENSIVE AIRMAN INFORMATION SYSTEM (CAIS)	
System No.: <del>100694</del>	
Description: Maintains a current database to support on-line <del>ac-</del> <b>cess</b> to airmen certification information. Batch mode provides reports, airmen directories, and <del>air-</del> men statistics.	<b>IRMP</b> Information Area:
	Aviation Safety Analysis System ( <del>ASAS</del> )
	Responsible Organization: AAC
	System Owner: AAC
	Software Owner: AAC
	Implementation Date: 07/01/1973
Network:	Annual Operating Costs ( <del>\$000</del> ): 600.7
Hardware: IBM 3084 Harris Display <del>Station</del>	Software: ADABAS Natural Intercomm
System Users:	

AVIATION MEDICAL EXAMINER SYSTEM	
System No.: <b>100696</b>	
Description: Maintains a master file of medical doctors and military installations authorized to perform medical examinations and issue FAA medical certificates. Provides various reports.	<b>IRMP</b> Information Area: Aviation Safety Analysis System ( <b>ASAS</b> )
	Responsible Organization: <b>AAC</b>
	System Owner: <b>AAC</b>
	Software Owner: <b>AAC</b>
	Implementation Date: <b>01/01/1977</b>
Network:	Annual Operating Costs (\$000): 23.5
Hardware: IBM 3084 Harris Display Station Personal Computers	Software: ADABAS Natural Intercomm <b>COBOL</b> Complete
System Users:	
TECHNICAL INSPECTION SCHEDULE	
System No.: <b>120613</b>	
Description: Monitors regional facility performance.	<b>IRMP</b> Information Area: Aviation Safety Analysis System ( <b>ASAS</b> )
	Responsible Organization: <b>ACE</b>
	System Owner: <b>ACE</b>
	Software Owner: <b>ACE</b>
	Implementation Date: <b>06/01/1978</b>
Network: <b>UNINET</b>	Annual Operating Costs (\$000): 5.3
Hardware: DG <b>MV18000</b>	Software: Interactive COBOL
System Users:	

INCIDENT TRACKING SYSTEM	
System No.: <b>150601</b>	
<b>Description:</b> Tracks near-midair collisions, pilot deviations, operational deviations, and operational errors. Provides 26 data elements associated with each incident. User access to the database provides nineteen different types of inquiries.	<b>IRMP</b> Information Area: Aviation Safety Analysis System ( <b>ASAS</b> )
	Responsible Organization: AGL-67
	System Owner: AGL-505
	Software Owner: AGL-67
	Implementation Date: <b>01/01/1986</b>
Network: LAN	Annual Operating Costs (\$000): 4.5
<b>Hardware:</b> DG MV/15000	<b>Software:</b> COBOL DG/DBMS
System Users: AGL	
SECURITY	
System No.: <b>180602</b>	
<b>Description:</b> Supports the Air Traffic scheduling and control of inspecting the detection devices at airports.	<b>IRMP</b> Information Area: Aviation Safety Analysis System ( <b>ASAS</b> )
	Responsible Organization: ASC
	System Owner: ASC
	Software Owner: ASO
	Implementation Date: <b>12/19/1983</b>
Network:	Annual Operating Costs (\$000): 13.4
<b>Hardware:</b> DG MV/8000	<b>Software:</b> COBOL INFOS
System Users:	

INCIDENT TRACKING SYSTEM	
System No.: <b>150601</b>	
<b>Description:</b> Tracks near-midair collisions, pilot deviations, operational deviations, and operational errors. Provides 26 data elements associated with each incident. User access to the database provides nineteen different types of inquiries.	<b>IRMP</b> Information Area: Aviation Safety Analysis System ( <b>ASAS</b> )

Network:	Annual Operating Costs (\$000): 13.4
<b>Hardware:</b> DG MV/8000	<b>Software:</b> COBOL INFOS
System Users:	

**FAA Missions Supported:**

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 4 Fulfillment of national defense requirements.
- 5 Efficient and economical program administration.

**FAA Goals Supported:**

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, **refine** and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and **airspace/airports resources**.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA pre-eminence in the world aviation community.

**FAA FY89 Objectives Supported:**

**AVIATION SAFETY:**

- 13 Implement an air carrier self-evaluation safety program. Develop the regulatory framework for carriers to "certify" their compliance with the Federal Aviation Regulations.
- 16 Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% from the **FY88** base.
- 19 Decrease operational errors by 5% from the **FY88** base.

**CAPACITY:**

- 22 Increase en route airspace capacity by establishing multiple routes between congested terminal areas. Improve the NAS system performance by reducing daily delays of 15 minutes or more by 5% from the FY88 base.
- 23 Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.
- 24 Complete development of criteria, procedures, and standards for the full implementation of the MLS.

**THE NAS PLAN:**

- 31 Complete the Microwave Landing System acceptance testing and commission the first site.
- 32 Maintain the thrust of **the** National Airspace System Plan and achieve 90% of the published milestones, as reflected in the FY89 schedule.
- 33 Publish a Research, Engineering, and Development (**R,E,&D**) Plan.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION:**

- 42 Expand the Minnesota "partnership" example of working closely with state governments to **coordinate** research programs, aviation career education and training programs, and airport and general aviation planning.

**FAA TRAINING:**

- 51 Update FAA training to meet 1990's technologies by establishing a new office of training and higher education, by conducting three prototype projects in conjunction with universities and industry, and by hosting two symposia on FAA job-related training.

**MANAGEMENT/COMMUNICATION:**

- 61 Issue the operating procedures to further implement straight-line management.
- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

**HUMAN RELATIONS:**

- 71 Emphasize professionalism and pride in the FAA work force and increase its involvement in decision-making by taking positive action at all levels of the agency in response to the SFA and by developing a succession plan for career leadership positions.

**FAA TRAINING:**

- 51 Update FAA training to meet 1990's technologies by establishing a new office of training and higher education, by conducting three prototype projects in conjunction with universities and industry, and by hosting two symposia on FAA job-related training.

**MANAGEMENT/COMMUNICATION:**

- 61 Issue the operating procedures to further implement straight-line management.
- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

**HUMAN RELATIONS:**

- 71 Emphasize professionalism and pride in the FAA work force and increase its involvement in decision-making by taking positive action at all levels of the agency in response to the SFA and by developing a succession plan for career leadership positions.

BUDGETARY AUTHORIZATION SYSTEM	
System No.: 010724	
Description: Distributes a list of agency funds by appropriation, region, and limitation. Produces budgetary authorizations on FAA Form 2510. Records and produces ledger reports from all fiscal year transactions.	IRMP Information Area:
	Financial Resources
	Responsible Organization: ABU-20
	System Owner: ABU-300
	Software Owner: ABU
	Implementation Date: 01/01/1977
Network:	Annual Operating Costs (\$000): 34.0
Hardware: DG MV28000 Dasher 400 Terminals	Software: COBOL AOSNS
System Users:	
COAST GUARD PAYROLL	
System No.: 100709	
Description: Provides a monthly accounting report showing the payroll of Coast Guard civilian employees. This information reflects employee expenditures by region and division, and by amount.	IRMP information Area:
	Financial Resources
	Responsible Organization: AAC
	System Owner: AAC
	Software Owner: AAC
	Implementation Date: 06/01/1974
Network:	Annual Operating Costs (\$000): 5.1
Hardware: IBM 3084	Software: COBOL IAM EXCESSORT
System Users:	

SPECIAL MAINTENANCE PROJECT/FIELD MAINTENANCE PARTIES (FMP)	
System No.: 120704	
Description: <b>Provides current month</b> data and cumulative special maintenance project status, maintains record of Airway Facilities FMP for type of work, costs, and budget projections.	<b>IRMP</b> Information Area:
	Financial Resources
	<b>Responsible</b> Organization: ACE
	System Owner: ACE
	Software Owner: ACE
	Implementation Date: <b>06/01/1986</b>
Network: N/A	Annual Operating Costs (\$000): 1.6
Hardware: DG MV/8000	Software: COBOL
System Users:	

MOTOR VEHICLE MANAGEMENT	
System No.: 120705	
Description: <b>Controls</b> inventory of motor vehicles, including Year-to-Date cost control of GSA vehicles.	<b>IRMP</b> Information Area:
	Financial Resource:
	<b>Responsible</b> Organization: ACE
	System Owner: ACE
	Software Owner: ACE
	Implementation Date: <b>06/01/1986</b>
Network: UNINET	Annual Operating Costs (\$000): 18.0
Hardware: DG MV/8000	Software: COBOL
System Users:	

SPECIAL MAINTENANCE PROJECT/FIELD MAINTENANCE PARTIES (FMP)	
System No.: 120704	
<b>Description:</b> Provides current month data and cumulative special maintenance project status, maintains record of Airway Facilities FMP for type of work, costs, and budget projections.	<b>IRMP</b> Information Area:
	Financial Resources
	<b>Responsible Organization:</b> ACE
	System Owner: ACE
	Software Owner: ACE
	Implementation Date: 06/01/1986
Network: N/A	Annual Operating Costs (\$000): 1.6
Hardware: DG MV/8000	Software: COBOL
System Users:	
MOTOR VEHICLE MANAGEMENT	
System No.: 120705	
<b>Description:</b> Controls inventory of motor vehicles, including Year-to-Date cost control of GSA vehicles.	<b>IRMP</b> Information Area:
	Financial Resource:
	<b>Responsible Organization:</b> ACE
	System Owner: ACE
	Software Owner: ACE
	Implementation Date: 06/01/1986
Network: UNINET	Annual Operating Costs (\$000): 18.0
Hardware: IDG MV/8000	Software: COBOL
System Users:	

ENERGY CONSERVATION	
System No.: 120788	
Description: Encompasses motor vehicle mileage and utilities (i.e., gas and electricity) with a history of its use.	<b>IRMP</b> Information Area:
	Financial Resources
	Responsible Organization: ACE
	System Owner: ACE
	Software Owner: ACE
	Implementation Date: 06/01/1978
Network: N/A	Annual Operating Costs (\$000): 4.3
Hardware: DG MV18000	Software: COBOL
System Users:	

MAN-HOURS PERSONNEL COSTS	
System No.: 140703	
Description: Provides analysis on accrual of man-hours and personnel costs at FY end by appropriation, object class, and pay system. Supports AEA-20.	<b>IRMP</b> Information Area:
	Financial Resources
	Responsible Organization: AEA-67
	System Owner: AAA
	Software Owner: AEA-43
	Implementation Date: 09/15/1980
Network:	Annual Operating Costs (\$000): 9.6
Hardware: DG MV15000	Software: COBOL
System Users:	

ENERGY CONSERVATION	
System No.: 120788	
Description: Encompasses motor vehicle mileage and utilities (i.e., gas and electricity) with a history of its use.	<b>IRMP</b> Information Area:
	Financial Resources
	Responsible Organization: ACE
	System Owner: ACE
	Software Owner: ACE
	Implementation Date: 06/01/1978
Network: N/A	Annual Operating Costs (\$000): 4.3
Hardware: DG MV18000	Software: COBOL
System Users:	

MAN-HOURS PERSONNEL COSTS	
System No.: 140703	
Description: Provides analysis on accrual of man-hours and personnel costs at FY end by appropriation, object class, and pay system. Supports AEA-20.	<b>IRMP</b> Information Area:
	Financial Resources
	Responsible Organization: AEA-67
	System Owner: AAA
	Software Owner: AEA-43
	Implementation Date: 09/15/1980
Network:	Annual Operating Costs (\$000): 9.6
Hardware: DG MV15000	Software: COBOL
System Users:	

MOTOR LICENSING SYSTEM	
System No.: 140710	
<b>Description:</b> Provides automatic printing of FAA Form 4670-I (operator's ID card application) and SF-46, in addition to providing reports. Supports AEA-50 and AEA-700.	<b>IRMP Information Area:</b> Financial Resources
	<del>Responsible Organization:</del> <b>Responsible Organization:</b> AEA-57B
	<b>System Owner:</b> AEA-54C
	<b>Software Owner:</b> AEA-43

## 16.6 HUMAN RESOURCES INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and FY89 objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
010614	Air Traffic Staffing Standards	78.0	5	4	63
010615	Aviation Standards Staffing Standards	11.5	5	4	63
010653	Uniform Retirement	3.3	5	4	63
000801	Employment Discrimination Tracking System	68.0	5	5	63
040801	Computer Aided Human Resources Planning System (CHURPS)	200.0	1,5	1,3,4	63
100852	ADP Project Management (PC/70)	84.8	5	2,4	63
120803	Personnel Statistical System	23.0	5	4,6	63
140605	Local Personnel Management information Reporting	28.1	5	4	63
140816	Organizational Development Information System	30.5	5	2	63
150801	Personnel Reporting System	4.2	5	4,6	63
170801	Personnel Employment Tracking System (PETS)	17.7	1,5	4,6	63,72,73
170802	Supervisory identification and Development Program	11.4	2,5	1,4	22,42,63
180801	Minority Group Statistics	6.4	5	4,5	63,72
180802	Personnel Statistical System	50.0	5	4,5	63,73
190601	Minority Group Statistics	0.0	5	3	63,71,72,73
190802	Personnel Staffing	4.5	5	3	61,63,71
200801	Drug/Alcohol Rehabilitation Tracking	1.1	5	2,4,6	63
200803	Airway Facilities Training History Requirements	2.2	5	2,4,6	63
200804	Position Description Master	13.2	5	2,4,6	63
200805	HRMD Project Control	4.0	5	2,4,6	63
200809	Personnel Statistical System	16.6	5	2,4,6	63
200810	Air Traffic Applicant Tracking System	66.4	5	2,4,6	63
200827	Personnel Workload Tracking - PD Log, OWCP, Retirement	36.1	5	2,4,6	63
200833	National Driver Registration	10.4	5	2,4,6	63
220816	Consolidated Personnel Management Information System (CPMIS)	3726.2	5	4,6	53
TOTAL		4605.5			

#### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 5 Efficient and economical program administration.

System Users:	

PERSONNEL <del>STATISTICAL</del> SYSTEM	
System No.: 120803	
<b>Description:</b> Supports recurring statistical analysis of the Agency workforce and the Positions authorized and filled. Also provides advance information on due-dates for taking various Personnel actions.	<b>IRMP</b> information Area:
	Human Resources
	<b>Responsible Organization:</b>
	ACE
	<b>System Owner:</b>
	ACE
	<b>Software Owner:</b>
	ACE
	<b>Implementation Date:</b>
	12/01/1965
<b>Network:</b> ADTN	<b>Annual Operating Costs (\$000):</b> 20.0
<b>Hardware:</b> DG MV/8000 RJE	<b>Software:</b> COBOL
<b>System Users:</b>	
<b>LOCAL PERSONNEL MANAGEMENT INFORMATION <del>REPORTING</del></b>	
System No.: 140805	
<b>Description:</b> Supports and generates reports for the Civil Rights Officer, the Personnel Management Division, and the Budget Division.	<b>IRM P</b> information Area:
	Human Resource:
	<b>Responsible Organization:</b>
	AEA-1 C
	<b>System Owner:</b>
	AEA-1 H
	<b>Software Owner:</b>
	AEA-43
	<b>implementation Date:</b>

<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 28.1
<b>Hardware:</b> DG MV/15000	<b>Software:</b> COBOL
<b>System Users:</b>	

PERSONNEL EMPLOYMENT TRACKING SYSTEM (PETS)	
System No.: 170801	
<b>Description:</b> Provides status information concerning applicants for employment, from the original application, to register placement, security and medical checks, and enrollment at the FAA Academy.	<b>IRMP</b> information Area: Human Resources
	Responsible Organization: ANM-1 C
	System Owner: ANM-1 C
	Software Owner: ANM-1 C
	Implementation Date: 06/01/1985
Network: TYMNET	Annual Operating Costs (\$000): 17.7
<b>Hardware:</b> DG MV/8000 II IBM-compatible PCs	<b>Software:</b> COBOL DG/DBMS dBASE III SmartTerm 400
System Users: ANM	
SUPERVISORY IDENTIFICATION AND DEVELOPMENT PROGRAM	
System No.: 170802	
<b>Description:</b> Provides an inventory of employees interested in becoming supervisors within the air traffic job family.	<b>IRMP</b> information Area: Human Resources
	Responsible Organization: ANM-500
	System Owner: ANM-10
	Software Owner: ANM-10
	Implementation Date: 01/15/1986
Network: TYMNET	Annual Operating Costs (\$000): 11.4
<b>Hardware:</b> DG MV/8000 II IBM-compatible PCs	<b>Software:</b> COBOL DG/DBMS
System Users: ANM	

MINORITY GROUP STATISTICS	
System No.: 180891	
Description: Supports and produces minority and female statistics by grade, series, organization, etc.	IRMP information Area: Human Resources
	Responsible Organization: ASO
	System Owner: ASO
	Software Owner: ASO
	Implementation Date: 01/09/1984
Network:	Annual Operating Costs (\$000): 6.4
Hardware: DG MV/8000	Software: COBOL INFOS-II
System Users:	

PERSONNEL STATISTICAL SYSTEM	
System No.: <del>180802</del>	
Description: Supports a statistical analysis of the agency workforce and the positions that are authorized, filled, and vacant.	IRMP information Area: Human Resources
	Responsible Organization: ASO
	System Owner: ASO
	Software Owner: ASO
	Implementation Date: 11/05/1979
Network:	Annual Operating Costs (\$000): 59.9
Hardware: DG <del>MV/8000</del>	Software: COBOL INFOS-II
System Users:	

MINORITY GROUP STATISTICS	
System No.: <b>180801</b>	
Description: Supports and produces minority and female statistics by grade, series, organization, etc.	IRMP information Area: Human Resources
	Responsible Organization: ASO
	System Owner: ASO
	Software Owner: ASO
	Implementation Date: 01/09/1984
Network:	Annual Operating Costs (\$000): 6.4
Hardware: DG MV/8000	Software: COBOL INFOS-II
System Users:	
PERSONNEL STATISTICAL SYSTEM	
System No.: <b>180802</b>	
Description: Supports a statistical analysis of the agency workforce and the positions that are authorized, filed, and vacant.	IRMP information Area: Human Resources
	Responsible Organization: ASO
	System Owner: ASO
	Software Owner: ASO
	Implementation Date: 11/05/1979
Network:	Annual Operating Costs (\$000): 59.9
Hardware: DG MV/8000	Software: COBOL INFOS-II
System Users:	

DRUG/ALCOHOL REHABILITATION TRACKING	
System No.: 200801	
Description: Tracks drug, alcohol, and substance abuse cases.	IRMP information Area:
	Human Resources
	Responsible Organization: AWP-1 C
	System Owner: AWP-1 E
	Software Owner: AWP-43
	Implementation Date: 11/01/1988
Network:	Annual Operating Costs (\$000): 1.1
Hardware: DG MV/15000	Software: COBOL INFOS-II DG Present
System Users:	
AIRWAY FACILITIES TRAINING HISTORY REQUIREMENTS	
System No.: 200803	
Description: Provides Airway Facility Managers with the necessary information to manage and monitor the training requirements of the employees in their area of responsibility.	IRMP information Area:
	Human Resources
	Responsible Organization: AWP-400
	System Owner: AWP-400
	Software Owner: AWP-43
	Implementation Date: 05/09/1988
Network: None	Annual Operating Costs (\$900): 2.2
Hardware: DG MV/15000 IBM PC	Software: COBOL ANSI 74 dBASE iii
System Users:	

DRUG/ALCOHOL REHABILITATION TRACKING	
System No.: 200801	
Description: Tracks drug, alcohol, and substance abuse cases.	IRMP information Area:
	Human Resources
	Responsible Organization: AWP-1 C
	System Owner: AWP-1 E
	Software Owner: AWP-43
	implementation Date: 11/01/1988

Hardware: DG MV/15000 IBM PC	Software: COBOL ANSI 74 dBASE iii
System Users:	

PERSONNEL <del>STATISTICAL</del> SYSTEM	
System No.: <del>200809</del>	
Description: Provides personnel reports on ail assigned employees.	IRMP information Area: Human Resources
	Responsible Organization: AWP-10
	System Owner: AWP-10
	Software Owner: AWP-43
	Implementation Date: 09/30/1983
Network: None	Annual Operating Costs (\$000): 16.6
Hardware: DG <del>MV/I</del> 5000	Software: COBOL ANSI 74
System Users:	
AIR TRAFFIC APPLICANT TRACKING SYSTEM	
System No.: <del>200810</del>	
Description: Provides information for tracking the status of air controller applicants' medical and personnel <del>clearances</del> .	IRMP information Area: Human Resources
	Responsible Organization: AWP-10
	System Owner: <del>AWP-10</del>
	Software Owner: AWP-43
	Implementation Date: 12/20/1983
Network:	Annual Operating Costs (\$000): 66.4
Hardware: DG <del>MV/I</del> 5000	Software: COBOL INFOS-II
System Users:	

PERSONNEL WORKLOAD TRACKING - PD LOG, OWCP, RETIREMENT	
System No.: 200827	
<b>Description:</b> Tracks the movement of various activities throughout the HRMD. Features action status as well as historical data.	<b>IRMP information Area:</b> Human Resources
	Responsible Organization: AWP-10
	System Owner: AWP-10
	Software Owner: AWP-43
	Implementation Date: 06/30/1984
Network:	Annual Operating Costs (\$000): 36.1
<b>Hardware:</b> DG MV/15000	<b>Software:</b> COBOL ANSI 74 Present Utility
System Users:	
NATIONAL DRIVER REGISTRATION	
System No.: 200833	
<b>Description:</b> Maintains national registration control of driver's licenses.	<b>IRMP information Area:</b> Human Resources
	Responsible Organization: AWP-52
	System Owner: AWP-52
	Software Owner: AWP-43
	Implementation Date: 06/27/1985
Network:	Annual Operating Costs (\$000): 10.4
<b>Hardware:</b> DG MV/15000	<b>Software:</b> COBOL ANSI 74
System Users:	

PERSONNEL WORKLOAD TRACKING - PD LOG, OWCP, RETIREMENT	
System No.: 200827	
<b>Description:</b> Tracks the movement of various activities throughout the HRMD. Features action status as well as historical data.	<b>IRMP information Area:</b> Human Resources

FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.

FAA FY89 Objectives Supported:

**CAPACITY:**

- 23 Assist state and local governments in planning for new airport construction, and in expanding the capacity of existing airports.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION:**

- 42 Expand the Minnesota **"partnership" example** of working closely with state governments to coordinate research programs, aviation career education and training programs, and airport and general aviation planning.

**MANAGEMENT/COMMUNICATION:**

- 61 Issue the operating procedures to further implement straight-line management.
- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

NATIONAL SUPPLY SYSTEM	
System No.: 010993	
Description: Maintains supply support for existing operational facilities and equipment. Maintains a database of inventory, including item identification, requirements, storage, and acquisitions.	IRMP information Area:
	Materiel Resources
	Responsible Organization: ALG
	System Owner: AAC
	Software Owner: M C
	Implementation Date: 06/01/1978
Network:	Annual Operating Coats (\$000): 819.6
Hardware: IBM 3084 incoterm Terminals incoterm Printers Centronic Printers	Software: COBOL COBOL ANS ALC
System Users: AAC, ACE, AEA, ALG, <b>ASO</b> , ASW, AWP	

PERSONAL PROPERTY IN-USE MANAGEMENT SYSTEM II	
System No.: 010995	
Description: Maintains an inventory of in-use personal property.	IRMP information Area:
	Materiel Resources
	Responsible Organization: ALG
	System Owner: ALG
	Software Owner: AWP
	Implementation Date: 03/31/1985
Network: ADTN (ANE,AGL,ANM)	Annual Operating Costs (\$000): 1297.0
Hardware: DG <b>MV/15000</b> Dasher 400 Terminals	Software: COBOL
System Users: AAC, <b>AAL</b> , ACE, ACT, AEA, AGL, ALG, ANE, ANM, <b>ASO</b> , ASW, AWP	

NATIONAL SUPPLY SYSTEM

## 16.8 NATIONAL AIRSPACE SYSTEM (NAS) FACILITIES INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
<del>041006</del>	Maintenance Management System (MMS)		5	<del>3</del> 4	63
041016	Airway Facilities (AF) Sector Level Staffing Standards System	56.0	5	4	63
041065	Line Performance Reporting System (Line Outage)	11.5	5	<del>1,3,4,6</del>	63
041076	Applications Engineering Tandem		1	<del>3,6</del>	63
041092	National Airspace System Performance Reporting System		5	<del>3,4,6</del>	<del>63</del>
041093	Facility And Service Outage Reporting System	71.6	5	<del>1,3,4,6</del>	<del>63</del>
041094	Engine Generator	31.5	5	<del>3,4,6</del>	<del>63</del>
041095	Frequency Assignment System		5	<del>3,6</del>	63
<del>041096</del>	<del>Facilities And Equipment Reporting System (FERS/PIFF)</del>	45.0	5	<del>3,4,6</del>	<del>63</del>
041097	Energy Management Reporting System (EMRS)	202.0	5	<del>3,4</del>	<del>63</del>

#### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 4 Fulfillment of national defense requirements.
- 5 Efficient and economical program administration.

FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA pre-eminence in the world aviation community.

FAA **FY89 Objectives** Supported:

AVIATION **SAFETY**:

- 14 Conduct at least four (4) safety and **efficiency** reviews and meet 80% of the corrective action milestones.
- 19 Decrease operational errors by 5% **from** the FY-88 base.

**CAPACITY**:

- 21 Expand the use of the National Airspace System Performance Analysis Capability (**NASPAC**) to plan for the needed NAS capacity enhancements.
- 22 Increase en route airspace capacity by establishing multiple routes between congested terminal areas. Improve the NAS system performance by reducing daily delays of 15 minutes or more by 5% from the FY-88 base.
- 24 Complete development of criteria, procedures, and standards for the full implementation of the MLS.

**THE NAS PLAN**:

- 31 Complete the Microwave Landing System acceptance testing and commission the first site.
- 32 Maintain the thrust of the National Airspace System Plan and achieve 90% of the published milestones, as reflected in the FY-89 schedule.
- 33 Publish a Research, Engineering, and Development (**R,E,&D**) Plan.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION**:

- 42 Expand the Minnesota "partnership" example of working closely with state governments to coordinate research programs, aviation **career** education and training programs, and airport and general aviation planning.

**FAA TRAINING**:

- 51 Update FAA training to meet 1990's technologies by establishing a new **office** of training and higher ed, by conducting three prototype projects in conjunction with universities and industry, and by hosting two symposia on FAA job-related training.

FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 3 Develop, refine and implement FAA programs and long-range plans.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA pre-eminence in the world aviation community.

FAA **FY89 Objectives** Supported:

AVIATION **SAFETY**:

- 14 Conduct at least four (4) safety and **efficiency** reviews and meet 80% of the corrective action milestones.
- 19 Decrease operational errors by 5% **from** the FY-88 base.

**CAPACITY**:

- 21 Expand the use of the National Airspace System Performance Analysis Capability (**NASPAC**) to plan for the needed NAS capacity enhancements.
- 22 Increase en route airspace capacity by establishing multiple routes between congested terminal areas. Improve the NAS system performance by reducing daily delays of 15 minutes or more by 5% from the FY-88 base.
- 24 Complete development of criteria, procedures, and standards for the full implementation of the MLS.

**THE NAS PLAN**:

- 31 Complete the Microwave Landing System acceptance testing and commission the first site.
- 32 Maintain the thrust of the National Airspace System Plan and achieve 90% of the published milestones, as reflected in the FY-89 schedule.
- 33 Publish a Research, Engineering, and Development (**R,E,&D**) Plan.

**GOVERNMENT/INDUSTRY PROMOTION OF AVIATION**:

- 51 Update FAA training to meet 1990's technologies by establishing a new **office** of training and higher ed, by conducting three prototype projects in conjunction with universities and industry, and by hosting two symposia on FAA job-related training.

MAINTENANCE MANAGEMENT SYSTEM (MMS)	
System No.: <b>041006</b>	
<b>Description:</b> Supports automated facility logging, performance reporting, PM scheduling, and record keeping functions for facility modifications and inspections at sectors, work centers, regional offices, and FAA support organizations.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible <b>Organization:</b> AES-420
	System Owner: AES-420
	Software Owner: AES-420
	Implementation Date: <b>06/01/1987</b>
Network:	Annual Operating Costs (\$000):
Hardware: Tandem Non-Stop II Tandem 6530 Terminal IBM-compatible PCs	Software: Tandem
System Users:	
AIRWAY FACILITIES (AF) SECTOR LEVEL STAFFING STANDARDS SYSTEM	
System No.: <b>041016</b>	
<b>Description:</b> Determines the field maintenance workload for Airway Facilities.	<b>IRMP</b> Information Area: National Airspace System (NAS) Facilities
	Responsible <b>Organization:</b> ASM
	System Owner: ASM-230
	Software Owner: ASM-220
	Implementation Date: <b>06/10/1982</b>
Network: Boeing	Annual Operating Costs (\$000): 56.0
Hardware: Boeing Cyber 174 Various Terminals Various Printers	Software: <b>RUS</b> COBOL FORTRAN
System Users:	

MAINTENANCE MANAGEMENT SYSTEM (MMS)	
System No.: 041006	
<b>Description:</b> Supports automated facility logging, performance reporting, PM scheduling, and record keeping functions for facility modifications and inspections at <del>sectors</del> , work centers, regional offices, and FAA support organizations.	<b>IRMP</b> Information Area: National Airspace System (NAS) Facilities
	Responsible Organization: AES-420

Network: Boeing	Annual Operating Costs (\$000): 71.5
Hardware: CDC Cyber Various Terminals Various Printers	Software: FORTRAN COBOL RUS
System Users:	

FACILITIES AND EQUIPMENT REPORTING SYSTEM (FERS/FF)	
System No.: 041096	
Description: Reports F&E (Project) status as a <del>pre-commis-</del> sioned facility file.	<b>IRMP</b> Information Area: National Airspace System (NAS) Facilities
	<b>Responsible Organization:</b> APSIASM
	<b>System Owner:</b> APS-11 <del>O/ASM-230</del>
	<b>Software Owner:</b> APSIASM
	<b>Implementation Date:</b> 06/11 0/1 982
Network: Boeing	Annual Operating <del>Costs</del> (\$000): 46.0
Hardware: Boeing Cyber 174	Software: RUS COBOL FORTRAN
System Users:	

ENERGY MANAGEMENT REPORTING SYSTEM (EMRS)	
System No.: <del>041097</del>	
Description: Reports energy conservation cost information by facility. A prototype system at ASW. Becomes part of Maintenance Management System (MMS) on 02/28/86.	<b>IRMP</b> Information Area: National Airspace System (NAS) Facilities
	<b>Responsible Organization:</b> ASM-230
	<b>System Owner:</b> ASM-230
	<b>Software Owner:</b> ASM-230
	<b>Implementation Date:</b> 09/01/1984
Network:	Annual Operating Costs (\$000): 202.0
Hardware: DG MV/8000	Software: INFOS COBOL
System Users:	

FACILITIES MASTER FILE (FMF)	
System No.: 041099	
Description: identifies all NAS facilities (present & future).	IRMP information Area: National Airspace System (NAS) Facilities
	Responsible Organization: ASM-230
	System Owner: ASM-230
	Software Owner: ASM-220
	Implementation Date: 06/10/1982
Network: Boeing	Annual Operating Costs (\$000): 120.8
Hardware: Boeing Cyber 174	Software: RUS COBOL FORTRAN
System Users:	
DRAWING INDEX	
System No.: 111001	
Description: Tracks plant drawings and electronic drawings. Gives current status, telling which station has which drawings. Provides the number of drawings in the system.	IRMP information Area: National Airspace System (NAS) Facilities
	Responsible Organization: <del>ASM-153</del>
	System Owner: <del>ASM-153</del>
	Software Owner: <del>ASM-167</del>
	Implementation Date: 07/01/1981
Network:	Annual Operating Costs (\$000): 13.9
Hardware: DG MV/15000 DG Dasher D460 Term	Software: DG AOSNS COBOL
System Users:	

FACILITIES MASTER FILE (FMF)	
System No.: 041099	
Description: identifies all NAS facilities (present & future).	IRMP information Area:

Hardware: DG MV/15000 DG Dasher D460 Term	Software: DG AOSNS COBOL
System Users:	

SPECIAL MAINTENANCE PROGRAM (SMP)	
System No.: <b>171005</b>	
Description: Tracks SMP projects for completion, priority, and location.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible Organization: ANM
	System Owner: ANM-400
	Software Owner: ANM-400
	Implementation Date: <b>01/01/1971</b>
Network: TYMNET	Annual Operating Costs (\$000): 4.7
Hardware: IBM-compatible PCs	Software: dBASE ii
System Users: ANM	

FIELD MAINTENANCE PROGRAM (FMP)	
System No.: <b>171006</b>	
Description: Tracks FMP projects for completion, priority, and location.	<b>IRMP</b> Information Area: National Airspace System (NAS) Facilities
	Responsible Organization: ANM
	System Owner: ANM-400
	Software Owner: ANM
	Implementation Date: <b>01/01/1971</b>
Network: BCS	Annual Operating Costs (\$000): 1.6
Hardware: DG <del>MV/8000</del> ii	Software: RUS RJE
System Users: ANM	

TECHNICAL INSPECTION	
System No.: 171007	
<b>Description:</b> Tracks and schedules statistical information on inspection requirements of NAS facilities.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible Organization: ANM
	System Owner: ANM-400
	Software Owner: ANM-400
	implementation Date: 01/01/1971
Network: BCS	Annual Operating Costs (\$000): 11.0
Hardware: DG MV/8000 II	Software: RUS RJE
System Users: ANM	
PERIODIC MAINTENANCE	
System No.: 181001	
<b>Description:</b> Manages all Airway Facilities (AF) facilities and updates the PM cards.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible Organization: ASC
	System Owner: ASC
	Software Owner: ASC
	implementation Date: 06/01/1971
Network: BCS	Annual Operating Costs (\$000): 14.6
Hardware: DG MV/8000	Software: COBOL INFOS
System Users:	

TECHNICAL INSPECTION	
System No.: 171007	
<b>Description:</b> Tracks and schedules statistical information on inspection requirements of NAS facilities.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible <b>Organization:</b> ANM
	System <b>Owner:</b> ANM-400
	Software <b>Owner:</b> ANM-400
	implementation Date: 01/01/1971
Network: BCS	Annual Operating <b>Costs</b> (\$000): 11.0
Hardware: DG <b>MV/8000 II</b>	Software: RUS RJE
System Users: ANM	
PERIODIC MAINTENANCE	
System No.: 181001	
<b>Description:</b> Manages all Airway Facilities (AF) facilities and updates the PM cards.	<b>IRMP</b> information Area: National Airspace System (NAS) <b>Facilities</b>
	Responsible Organization: ASC
	System <b>Owner:</b> ASC
	Software <b>Owner:</b> ASC
	implementation Date: 06/01/1971
Network: BCS	Annual Operating Costs (\$000): 14.6
Hardware: DG <b>MV/8000</b>	Software: COBOL INFOS
System Users:	

FACILITY PERFORMANCE SYSTEM	
System No.: 201014	
<b>Description:</b> Provides reports based on facility outages showing sector and facility performance.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible Organization: AWP400
	System Owner: AWP-400
	Software Owner: AWP-43
	Implementation Date: 09/15/1984
Network:	Annual Operating Costs (\$000): 17.5
Hardware: DG MV/1 5000	Software: COBOL ANSI 74
System Users:	
FACILITIES DRAWING (ANM-67)	
System No.: 201034	
<b>Description:</b> Maintains an index of blueprint drawings.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible Organization: AWP-43
	System Owner: ANM60
	Software Owner: AWP-43
	Implementation Date: 06/30/1985
Network: ADTN	Annual Operating Costs (\$000): -6.9
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

FACILITY PERFORMANCE SYSTEM	
System No.: 201014	
<b>Description:</b> Provides reports based on facility outages showing sector and facility performance.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible Organization: AWP400
	System Owner: AWP-400
	Software Owner: AWP-43
	Implementation Date: 09/15/1984
Network:	Annual Operating Costs (\$000): 17.5
Hardware: DG MV/1 5000	Software: COBOL ANSI 74
System Users:	
FACILITIES DRAWING (ANM-67)	
System No.: 201034	
<b>Description:</b> Maintains an index of blueprint drawings.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	Responsible Organization: AWP-43
	System Owner: ANM60
	Software Owner: AWP-43

Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

AND MANAGEMENT INFORMATION SYSTEM	
System No.: 241013	
<b>Description:</b> Monitors and reports on the development and implementation of all research and development activity and all major products of the NAS plan for the AND and AAF Associate Administrators.	<b>IRMP</b> information Area: National Airspace System (NAS) Facilities
	<b>Responsible</b> Organization: AND-I 0
	System Owner: AND-1 0
	Software Owner: AND-I 0
	implementation Date: <b>08/22/1</b> 983
<b>Network:</b>	Annual Operating Costs (\$000): 300.0
<b>Hardware:</b> Wang VS1 00	Software: COBOL
<b>System</b> Users:	

## 16.9 OFFICE AUTOMATION AND MANAGEMENT SUPPORT INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information **area**. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
011117	FAA Directory	31.4	<del>3,4,5</del>	<del>2,4</del>	<del>63</del>
011118	Directives Management Information System	<del>52.0</del>	<del>1,2,5</del>	<del>4</del>	63
011121	The Administrator's Correspondence Control And Information System (ACCIS)	50.0	5	<del>2,3,6</del>	63
011125	Project Tracking System	46.9	5	6	63
011126	Problem Reporting System	26.6	5	4	63
011127	Mean Time to Failure	19.5	5	4	63
011128	Tape Library System	15.0	5	<del>4,6</del>	<del>63</del>
011129	ADP Equipment Inventory System	167.0	5	6	<del>63</del>
011131	AMS Office Automation and Systems Support	5195.0	5	6	83
041112	<del>Computer-Aided Engineering</del> Graphics	<del>1087.0</del>	5	<del>4,6</del>	63
051102	GC Information Resource Management System (IRMS)	868.0	<del>3,5</del>	<del>1,2,4</del>	63
061106	Public Affairs (APA) information System	<del>170.0</del>	<del>1,3,5</del>	<del>1,3,4,6,7</del>	<del>63</del>
111105	<del>Office</del> Automation, Alaskan Region	15.0	5	4	63
121107	Automated Scheduling And Control	20.0	5	<del>4,6</del>	<del>63</del>
121110	Supply Inventory System	2.7	5	<del>4,6</del>	<del>63</del>
131107	National Administration and Management Systems	712.0	<del>1,5</del>	<del>3,4</del>	83
131108	Technical Center Local Management and Administrative Systems	<del>820.0</del>	<del>1,5</del>	<del>3,4,6</del>	<del>63</del>
181101	Word Processing Statistics	31.1	5	4	<del>61,63</del>
181103	<del>Office</del> Automation	299.4	5	<del>2,4</del>	<del>63,73</del>
181104	<del>Job</del> Scheduling System	4.5	5	4	<del>63</del>
181106	Forms Catalog	2.9	5	4	63
<del>181109</del>	Tape Library System	16.3	5	4	<del>63</del>
201132	Region Forms Automation	6.9	5	<del>2,4,6</del>	<del>63</del>
221118	<del>Office Automation-AMR</del>		<del>1,5</del>	<del>4,6</del>	63
TOTAL		96592			

FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad.
- 4 Fulfillment of national defense requirements.
- 5 Efficient and economical program administration.

## 16.9 OFFICE AUTOMATION AND MANAGEMENT SUPPORT INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

221118	<del>Office Automation - AMR</del>		<b>1,5</b>	<b>4,6</b>	63
TOTAL		96592			

FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad.
- 4 Fulfillment of national defense requirements.
- 5 Efficient and economical program administration.

FAA DIRECTORY	
System No.: 011117	
<b>Description:</b> Maintains a database of names, addresses, and phone numbers of all agency managers. Produces a tape semi-annually, used to print the FAA directory.	<b>IRMP Information Area:</b> Office Automation and Management Support
	<b>Responsible Organization:</b> AMS-420
	<b>System Owner:</b> AMS-420
	<b>Software Owner:</b> AMS-420
	<b>Implementation Date:</b> 10/01/1977
<b>Network:</b> c s c	<b>Annual Operating Costs (\$000):</b> 31.4
<b>Hardware:</b> Sperry Univ. 1100-80	<b>Software:</b> General Processing System COBOL Aladin
<b>System Users:</b> AAC, AAL, ACE, ACT, AEA, AGL, AMS, ANE, ANM, ASO, ASW, AWP	

DIRECTIVES MANAGEMENT INFORMATION SYSTEM	
System No.: 011118	
<b>Description:</b> Maintains a file of records detailing the status of all agency directives. Updated semi-annually to produce a checklist report for publication and a statistical report for measuring the activity of the directives.	<b>IRMP Information Area:</b> Office Automation and Management Support
	<b>Responsible Organization:</b> AMS-420
	<b>System Owner:</b> AMS-420
	<b>Software Owner:</b> AMS-420
	<b>Implementation Date:</b> 02/01/1980
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 52.0
<b>Hardware:</b> DG MV15000	<b>Software:</b> INFOCEN
<b>System Users:</b> AAC, AAL, ACE, ACT, AEA, AGL, AMS, ANE, ANM, ASO, ASW, AWP	

THE ADMINISTRATOR'S CORRESPONDENCE CONTROL AND INFORMATION SYSTEM (ACCIS)	
System No.: 011121	
<b>Description:</b> Extends control to all FAA organizations. Monitors all incoming and outgoing documents, including White House referral and Congressional correspondence. Has a query capability and generates reports on demand.	<b>IRMP</b> Information Area: Office Automation and Management Support
	<b>Responsible</b> Organization: AMS-350
	System Owner: AOA
	Software Owner: AMS
	<b>Implementation</b> Date: 07/12/1982
Network:	Annual Operating Costs (\$000): 50.0
Hardware: Wang VS1 OOA	Software: COBOL
System Users: AMS	
<b>PROJECT TRACKING SYSTEM</b> System No.: 011125	
<b>Description:</b> Tracks and controls management projects.	<b>IRMP</b> Information Area: Office Automation and Management Support
	<b>Responsible</b> Organization: AMS-350
	System Owner: AMS-1
	Software Owner: AMS-350
	<b>Implementation</b> Date: 12/31/1986
Network:	Annual Operating Costs (\$000): 46.9
Hardware: Nang VS Nang PCs	Software: Custom
System Users: AMS	

THE ADMINISTRATOR'S CORRESPONDENCE CONTROL AND INFORMATION SYSTEM (ACCIS)	
System No.: 011121	
Description: Extends control to all FAA organizations. Monitors all incoming and outgoing documents, including White House referral and Congressional correspondence. Has a query capability and generates reports on demand.	<b>IRMP</b> Information Area: Office Automation and Management Support
	Responsible Organization: AMS-350
	System Owner: AOA
	Software Owner: AMS
	Implementation Date: 07/12/1982
Network:	Annual Operating Costs (\$000): 50.0
Hardware: Wang VS100A	Software: COBOL
System Users: AMS	
PROJECT TRACKING SYSTEM	
System No.: 011125	
Description: Tracks and controls management projects.	<b>IRMP</b> Information Area: Office Automation and Management Support
	Responsible Organization: AMS-35C
	System Owner: AMS-1
	Software Owner: AMS-350
	Implementation Date: 12/31/1986
Network:	Annual Operating Costs (\$000): 46.9
Hardware: Nang VS Nang PCs	Software: Custom
System Users: AMS	

TAPE LIBRARY SYSTEM	
System No.: 011128	
<b>Description:</b> Tracks all the tapes in the AMS-350 data processing center. Deletes, modifies, creates, and tracks all tapes by subject and location.	<b>IRMP Information Area:</b> Office Automation and Management Support
	<b>Responsible Organization:</b> AMS-350
	<b>System Owner:</b> AMS-350
	<b>Software Owner:</b> AMS-350
	<b>Implementation Date:</b> 12/01/1988
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 15.1
<b>Hardware:</b> DG MV15000	<b>Software:</b> COBOL
<b>System Users:</b> AMS	
ADP EQUIPMENT INVENTORY SYSTEM	
System No.: 011129	
<b>Description:</b> Tracks the location of and maintenance on ADP equipment.	<b>IRMP Information Area:</b> Office Automation and Management Support
	<b>Responsible Organization:</b> AMS-350
	<b>System Owner:</b> AMS-350
	<b>Software Owner:</b> AMS-350
	<b>Implementation Date:</b> 06/30/1988
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 167.4
<b>Hardware:</b> DG B (MW15000)	<b>Software:</b> INFOS-II
<b>System Users:</b> A M S	

TAPE LIBRARY SYSTEM	
System No.: 011128	
<b>Description:</b> Tracks all the tapes in the AMS-350 data processing center. Deletes, modifies, creates, and tracks all tapes by subject and location.	<b>IRMP Information Area:</b> Office Automation and Management Support
	<b>Responsible Organization:</b> AMS-350
	<b>System Owner:</b> AMS-350
	<b>Software Owner:</b> AMS-350
	<b>Implementation Date:</b> 12/01/1988
Network:	Annual Operating Costs (\$000): 15.1
Hardware: DG MV/15000	Software: COBOL
System Users: AMS	
ADP EQUIPMENT INVENTORY SYSTEM	
System No.: 011129	
<b>Description:</b> Tracks the location of and maintenance on ADP equipment.	<b>IRMP Information Area:</b> Office Automation and Management Support
	<b>Responsible Organization:</b> AMS-350
	<b>System Owner:</b> AMS-350
	<b>Software Owner:</b> AMS-350
	<b>Implementation Date:</b> 06/30/1988
Network:	Annual Operating Costs (\$000): 167.4
Hardware: DG B (MW15000)	Software: INFOS-II
System Users: AMS	

GC INFORMATION RESOURCE MANAGEMENT SYSTEM (IRMS)	
System No.: 051102	
Description: Supports off ice automation, legal research, and case management and tracking.	IRMP Information Area: Office Automation and Management Support
	Responsible Organization: AGC
	System Owner: AGC
	Software Owner: AGC
	Implementation Date: 11/01/1984
Network: WANGNET	Annual Operating Costs (\$000): 868.0
Hardware: Wang VS300 Terminals (90) Wang PC (15)	Software: COBOL ASSEMBLER LEXIS JURIS
System Users:	
PUBLIC AFFAIRS (APA) INFORMATION SYSTEM	
System No.: 061106	
Description: Supports off ice automation and an aviation education database.	IRMP Information Area: Office Automation and Management Support
	Responsible Organization: APA
	System Owner: APA
	Software Owner: APA
	Implementation Date: 09/30/1984
Network:	Annual Operating Costs (\$000): 170.0
Hardware: Wang	Software: Wang Office COBOL
System Users:	

OFFICE AUTOMATION, ALASKAN REGION	
System No.: 111105	
<b>Description:</b> Comprises all of the off ice automation systems for the Alaskan Region.	<b>IRMP</b> Information Area: Office Automation and Management Support
	<b>Responsible Organization:</b> AAL
	<b>System Owner:</b> <del>AAI-60</del>
	<b>Software Owner:</b> <del>AAI-60</del>
	<b>Implementation Date:</b> 01/01/1988
Network:	Annual Operating Costs (\$000): 15.0
<b>Hardware:</b> Data Gen Dasher One Data Gen D-460/21 1 DG <del>MV/I</del> 5000	<b>Software:</b> Data General CEO SSI WordPerfect DG CEO Connection
System Users:	

AUTOMATED SCHEDULING AND CONTROL	
System No.: 121107	
<b>Description:</b> Maintains scheduling information on computer operations products. Provides batch entries, edits the data, and outputs the schedule and reports. Provides management control of tape files with an active inventory. Gives history of use.	<b>IRMP</b> Information Area: Office Automation and Management Support
	<b>Responsible Organization:</b> ACE
	<b>System Owner:</b> ACE
	<b>Software Owner:</b> AWP
	<b>Implementation Date:</b> 09/01/1982

FAA **FY89** Objectives Supported:

**AVIATION SAFETY:**

- 14 Conduct at least four (4) safety and efficiency reviews and meet 80% of the corrective action milestones.
- 16 Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% from the **FY88** base.
- 18 Establish a comprehensive timetable for the implementation of the recommendations of the recent International Conference on Aging Airplanes.
- 19 Decrease operational errors by 5% from the **FY88** base.

**MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

FAA **FY89** Objectives Supported:

**AVIATION SAFETY:**

- 14 Conduct at least four (4) safety and efficiency reviews and meet 80% of the corrective action milestones.
- 16 Place renewed emphasis on general aviation accident prevention. Reduce the number of accidents by 5% from the **FY88** base.
- 18 Establish a comprehensive timetable for the implementation of the recommendations of the recent International Conference on Aging Airplanes.
- 19 Decrease operational errors by 5% from the **FY88** base.

**MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

SCHEDULING SYSTEM	
System No.: 101265	
<b>Description:</b> Provides a media for scheduling all production processing to be done by the AAC-300 Data Service Division based on a <del>sevenday</del> <b>24-hour</b> per day schedule.	<b>IRMP</b> Information Area: Information Processing and Support
	Responsible Organization: AAC
	System Owner: AAC
	Software Owner: AAC
	Implementation Date: 08/01/1991
Network:	Annual Operating Costs (\$000): 27.5
Hardware: IBM 3084 3270 Protocol Terminal	Software: IBM ASSEMBLER COBOL EASYTRIEVE CAT
System Users:	
FS AUTOMATIC TRAINING/PERSONNEL TRACKING	
System No.: <del>201201</del>	
<b>Description:</b> Provides division managers of flight standards with the information they need to manage and monitor training and personnel requirements of their employees.	<b>IRMP</b> Information Area: Information Processing and Support
	Responsible Organization: AWP-200
	System Owner: AWP-200
	Software Owner: AWP-43
	Implementation Date: 06/01/1986
Network:	Annual Operating Costs (\$000): 2.6
Hardware: DG <del>MV/15000</del> IBM PC	Software: COBOL dBASE III
System Users:	

REMOTE JOB ENTRY (RJE) RETRIEVALS	
System No.: 201215	
<b>Description:</b> Uses high-speed transmission stations to retrieve remote job entries. Switched to a 4800 baud-rate dial-up.	<b>IRMP</b> Information Area: Information Processing and Support Responsible <b>Organization:</b> AWP-43 System Owner: AWP-43 Software Owner: AWP-43 Implementation Date: <b>05/31/1985</b>

## 16.11 HUMAN INTERFACE AND TRAINING INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
101303	Computer-Based instruction (CBI) Training	6632.7	<b>1,25</b>		63
101306	Academy Scoring	366.0	5	<b>1,4,7</b>	63
101349	FAA Academy Correspondence Course Training	37.9	5	<b>2,4</b>	63
101370	U.S. Postal Service Correspondence Course Training System	29.8		<b>1,4</b>	53
101371	FAA Radar Training System	2403.0	<b>1,5</b>	<b>1,4,7</b>	<b>63</b>
101372	Coast Guard Service-Wide Examination System	51.6		1	<b>63</b>
101373	Coast Guard Non-Resident Training	189.9		<b>1,4</b>	63
221306	<del>Microcomputer</del> Based Support For Managerial Decision Making	147.6	5	<b>4,6</b>	63
TOTAL		lc077.5			

#### FM Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 5 **Efficient** and economical program administration.

#### FAA Goals Supported:

- 1 Enhance U.S. Aviation Safety.
- 2 Build an FAA culture which nurtures achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.
- 6 Reduce regulatory and administrative burden.
- 7 Promote USA/FAA pre-eminence in the world aviation community.

#### FAA **FY89** Objectives Supported:

##### **MANAGEMENT/COMMUNICATION:**

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

COMPUTER-BASED INSTRUCTION (CBI) TRAINING	
System No.: 101303	
<b>Description:</b> Provides computer-based instructional programs operated by the FAA Academy, including airway facility and air traffic CBI systems.	<b>IRMP</b> Information Area: Human Interface and Training
	<b>Responsible Organization:</b> AAC-900
	<b>System Owner:</b> AAC-900
	<b>Software Owner:</b> AAC-900
	<b>Implementation Date:</b> 09/30/1985
<b>Network:</b> Multiplexing	<b>Annual Operating Costs (\$000):</b> 6832.7
<b>Hardware:</b> CDC 830	<b>Software:</b> PLATO
System Users:	
ACADEMY SCORING	
System No.: 101306	
<b>Description:</b> Scores tests and reports grades for air traffic students in the academy. Reports final student grades by course phases and monitors students test and lab progress.	<b>IRMP</b> Information Area: Human Interface and Training
	<b>Responsible Organization:</b> AAC
	<b>System Owner:</b> AAC
	<b>Software Owner:</b> AAC
	<b>Implementation Date:</b> 06/01/1980
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 388.0
<b>Hardware:</b> MicroVAX II	<b>Software:</b> MACRO FORTRAN 4-PLUS VMS
System Users:	

COMPUTER-BASED INSTRUCTION (CBI) TRAINING	
System No.: 101303	
Description: Provides computer-based instructional programs operated by the FAA Academy, including airway facility and air traffic CBI systems.	IRMP Information Area:
	Human Interface and Training
	Responsible Organization: AAC-900
	System Owner: AAC-900
	Software Owner: AAC-900
	Implementation Date: 09/30/1985
Network: Multiplexing	Annual Operating Costs (\$000): 6832.7
Hardware: CDC 830	Software: PLATO
System Users:	
ACADEMY SCORING	
System No.: 101306	
Description: Scores tests and reports grades for air traffic students in the academy. Reports final student grades by course phases and monitors students test and lab progress.	IRMP Information Area:
	Human Interface and Training
	Responsible Organization: AAC
	System Owner: AAC
	Software Owner: AAC
	Implementation Date: 06/01/1980
Network:	Annual Operating Costs (\$000): 388.0
Hardware: MicroVAX II	Software: MACRO FORTRAN 4-PLUS VMS
System Users:	

FAA RADAR <del>TRAINING</del> SYSTEM	
System No.: 101371	
<b>Description:</b> Drives both en route and terminal laboratories for the most realistic training available for ATC or radar position. Each sector can be operated independently with record/replay capabilities.	<b>IRMP Information Area:</b>
	Human Interface and Training
	<b>Responsible Organization:</b> AAC
	<b>System Owner:</b> AAC
	<b>Software Owner:</b> AAC
	<b>Implementation Date:</b> 06/01/1980
<b>Network:</b> Ethernet	<b>Annual Operating Costs (\$000):</b> 2400.0
<b>Hardware:</b> DEC VAX 8700 (3) DEC PDP-11/84 (17)	<b>Software:</b> VMS/RSX11S MACRO-I 1 Structured FORTRAN FORTRAN IV
<b>System Users:</b>	
<b>COAST GUARD SERVICE-WIDE EXAMINATION SYSTEM</b> System No.: 101372	
<b>Description:</b> Processes personal evaluations and skill-level exam qualification data. Provides statistical reports and ranks tests of regular and reserve enlisted and <del>Warrent</del> Officer candidates for promotion in the U.S. Coast Guard.	<b>IRMP Information Area:</b>
	Human Interface and Training
	<b>Responsible Organization:</b> AAC
	<b>System Owner:</b> Coast Guard Institute
	<b>Software Owner:</b> AAC
	<b>Implementation Date:</b> 09/01/1970
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 51.6
<b>Hardware:</b> IBM 3084 NCS7008 Optical Scanner C3 Terminals	<b>Software:</b> COBOL ANS SAS
<b>System Users:</b>

<b>System Users:</b>	

## 16.12 OTHER INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAAgency-level missions, FAA goals, and FY89 objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
071405	International Aviation information System (IAIS)	10.0	1,3	3,7	11
071408	Air Quality Program	130.0	5	1,4,7	23
071409	Energy Policy Analysis	60.0	2	3	63
071412	Energy Conservation Program	40.0	2	3	63
071414	Activity Forecast	97.0	1,2	1,3,7	21,22,23,24
071415	Policy/Analytical Studies	72.0	1,23	1,3,6,7	19
071416	Advisory Circular Data (AC-35)	40.0	3	4	23
071417	Aircraft Engine Emissions	30.0	3	4	23
071418	Airport Noise Modeling	400.0	5	4,6	23
071419	Environmental Noise/Economic Data System	30.0	2	3,4	23
101429	FAA Instructor Activity	181.0	1,5	1,4,7	63
101457	Problem Reporting	47.0	5	1	83
101462	Security	284.4	5	1	83
101465	Hardware/Software	920.5	5	1	63
101461	Aircraft Registration Record Administration System (ARRAS)	627	5	1	63
101499	Aircraft Registration System	331.3	5	1	83
191402	Address Gum Labels	1.5	5	3	63,71
191403	Automated Schedule And Control	16.5	5	3,4	63,71
201401	Air Traffic Electronic Mail	26	5	2,4,6	53
201402	Security Card Key System	0.3	5	2,4,6	63
201403	Electronic Mail Transfer-Airway Facilities	0.2	5	2,4,6	63
201416	Work Tracking - ADP Projects, Western Pacific	0.6	5	2,4,6	83
291417	Directives Revalidation	0.1	5	2,4,6	63
201418	Mailing Address Labels	3.9	5	2,4,6	63
201419	Automated Scheduling And Control, Tape Library	39.6	5	2,4,6	63
201422	Automated Documentation System	23	5	2,4,6	83
201428	Regional Workload Tracking-Administrative	0.1	5	2,4,6	63
201429	Management Information System (Present)	0.1	5	2,4,6	63
201430	Regional Workload Tracking Accounting Documents	51.1	5	2,4,6	63
201431	Trouble Reporting Systems		5	2,4,6	63
TOTAL		2854.8			

#### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad,
- 5 Efficient and economical program administration.

## 16.12 OTHER INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Presented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAAgency-level missions, FAA goals, and FY89 objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
071405	International Aviation information System (IAIS)	10.0	1,3	3,7	11
071408	Air Quality Program	130.0	5	1,4,7	23
071409	Energy Policy Analysis	60.0	2	3	63
071412	Energy Conservation Program	40.0	2	3	63
071414	Activity Forecast	97.0	1,2	1,3,7	21,22,23,24
071415	Policy/Analytical Studies	72.0	1,23	1,3,6,7	19
071416	Advisory Circular Data (AC-35)	40.0	3	4	23
071417	Aircraft Engine Emissions	30.0	3	4	23
071418	Airport Noise Modeling	403.0	5	4,6	23
071419	Environmental Noise/Economic Data System	30.0	2	3,4	23
101429	FAA Instructor Activity	181.0	1,5	1,4,7	63
101457	Problem Reporting	47.0	5	1	63
101462	Security	284.4	5	1	63
101466	Hardware/Software	920.5	5	1	63
101461	Aircraft Registration Record Administration System (ARRAS)	627	5	1	63
101499	Aircraft Registration System	331.3	5	1	63
191402	Address Gum Labels	1.5	5	3	63,71
191403	Automated Schedule And Control	16.5	5	3,4	63,71
201401	Air Traffic Electronic Mail	26	5	2,4,6	63
201402	Security Card Key System	0.3	5	2,4,6	63
201403	Electronic Mail Transfer-Airway Facilities	0.2	5	2,4,6	63
201416	Work Tracking - ADP Projects, Western Pacific	0.6	5	2,4,6	63
291417	Directives Revalidation	0.1	5	2,4,6	63
201418	Mailing Address Labels	3.9	5	2,4,6	63
201419	Automated Scheduling And Control, Tape Library	39.6	5	2,4,6	63
201422	Automated Documentation System	23	5	2,4,6	63
201428	Regional Workload Tracking-Administrative	0.1	5	2,4,6	63
201429	Management Information System (Present)	0.1	5	2,4,6	63
201430	Regional Workload Tracking Accounting Documents	51.1	5	2,4,6	63
201431	Trouble Reporting Systems		5	2,4,6	63
TOTAL		2854.8			

#### FAA Missions Supported:

- 1 Promotion of aviation safety.
- 2 Efficient utilization of airspace.
- 3 Promotion of air commerce and aviation at home and abroad,
- 5 Efficient and economical program administration.

INTERNATIONAL AVIATION INFORMATION SYSTEM (IAIS)	
System No.: 071405	
<b>Description:</b> Temporarily in operation while a LAN is set up and software is converted. Currently on the Plexus mini-computer, but is being converted to a 3Com LAN.	<b>IRMP Information Area:</b> <div>Other</div>
	<b>Responsible Organization:</b> <div>AIA-22C</div>
	<b>System Owner:</b> <div>AIA</div>
	<b>Software Owner:</b> <div>AIA</div>
	<b>Implementation Date:</b> <div>12/31/1987</div>
<b>Network:</b> Ethernet	<b>Annual Operating Costs (\$000):</b> <div>10.6</div>
<b>Hardware:</b> Plexus P-75 Micro-computer	<b>Software:</b> Progress DBMS COBOL C Language
<b>System Users:</b>	
<b>AIR QUALITY PROGRAM</b> System No.: 071408	
<b>Description:</b> Provides aircraft emission modeling/analysis tools for IBM and Apple PCs.	<b>IRMP Information Area:</b> <div>Other</div>
	<b>Responsible Organization:</b> <div>AEE</div>
	<b>System Owner:</b> <div>AEE-120</div>
	<b>Software Owner:</b> <div>AEE-120</div>
	<b>Implementation Date:</b> <div>04/15/1983</div>
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> <div>130.0</div>
<b>Hardware:</b> IBM PC-XT Apple IIe COMPAQ 386	<b>Software:</b> dBASE III BASIC CONDOR
<b>System Users:</b>	

ENERGY POLICY ANALYSIS		System No.: <b>071409</b>
<b>Description:</b> Develops and maintains cost and energy data for the FAA to analyze its energy policy and to plan its energy emergency contingency. Includes internal FAA energy conservation policy development.	<b>IRMP</b> Information Area:	
	Other	
	<b>Responsible Organization:</b> AEE-120	
	<b>System Owner:</b> AEE-120	
	<b>Software Owner:</b> <b>AOR-100</b>	
<b>Implementation Date:</b> <b>07/01/1988</b>		
<b>Network:</b> Boeing	<b>Annual Operating Costs (\$000):</b> 60.0	
<b>Hardware:</b> COMPAQ 386	<b>Software:</b> dBASE III	
<b>System Users:</b>		
<b>ENERGY CONSERVATION PROGRAM</b>		
		System No.: <b>071412</b>
<b>Description:</b> Supports aviation programs to promote and encourage fuel conservation. Provides methodology to quantify fuel savings from new or projected design or procedural changes in airport planning, air traffic control, and the NAS Plan.	<b>IRMP</b> Information Area:	
	Other	
	<b>Responsible Organization:</b> AEE-120	
	<b>System Owner:</b> AEE-120	
	<b>Software Owner:</b> <b>AOR-100</b>	
<b>Implementation Date:</b> <b>10/01/1988</b>		
<b>Network:</b> Boeing	<b>Annual Operating Costs (\$000):</b> 40.0	
<b>Hardware:</b> COMPAQ 386	<b>Software:</b> dBASE III	
<b>System Users:</b>		

ENERGY POLICY ANALYSIS		System No.: <b>071409</b>
<b>Description:</b> Develops and maintains cost and energy data for the FAA to analyze its energy policy and to plan its energy emergency contingency. Includes internal FAA energy conservation policy development.	<b>IRMP</b> Information Area:	
	Other	
	Responsible Organization:	AEE-120
	System Owner:	AEE-120
	Software Owner:	<b>AOR-100</b>
	Implementation Date:	<b>07/01/1988</b>
Network: Boeing	Annual Operating Costs (\$000):	60.0
Hardware: COMPAQ 386	Software: dBASE III	
System Users:		
ENERGY CONSERVATION PROGRAM		System No.: <b>071412</b>
<b>Description:</b> Supports aviation programs to promote and encourage fuel conservation. Provides methodology to quantify fuel savings from new or projected design or procedural changes in airport planning, air traffic control, and the NAS Plan.	<b>IRMP</b> Information Area:	
	Other	
	Responsible Organization:	AEE-120
	System Owner:	AEE-120
	Software Owner:	<b>AOR-100</b>
	Implementation Date:	<b>10/01/1988</b>
Network: Boeing	Annual Operating Costs (\$000):	40.0
Hardware: COMPAQ 386	Software: dBASE III	
System Users:		

ADVISORY CIRCULAR DATA (AC-36)	
System No.: 071416	
Description: Captures aircraft noise level data contained in Advisory Circulars.	IRMP Information Area: Other
	Responsible Organization: AEE
	System Owner: AEE-110
	Software Owner: AEE-110
	Implementation Date: 10/01/1978
Network:	Annual Operating Costs (\$000): 40.0
Hardware: COMPAQ 386	Software: dBASE III
System Users:	

AIRCRAFT ENGINE EMISSIONS	
System No.: 071417	
Description: Forecasts aviation activity and upper atmospheric pollution to assess airport pollution.	IRMP Information Area: Other
	Responsible Organization: AEE
	System Owner: AEE-100
	Software Owner: AEE-100
	Implementation Date: 06/01/1984
Network: BOEING	Annual Operating Costs (\$000): 30.0
Hardware: Kaypro 286	Software: FORTRAN BASIC dBASE III
System Users:	

<b>AIRPORT NOISE MODELING</b>		System No.: 071418
<b>Description:</b> Provides a set of airport noise analysis tools on IBM PCs for airport planners.	<b>IRMP Information Area:</b>	
	Other	
	Responsible Organization:	AEE-120
	System Owner:	AEE-120
	Software Owner:	AEE-120
	Implementation Date:	01/30/1985
Network:	Annual Operating Costs (\$000):	400.0
<b>Hardware:</b> IBM PC-XT HP 7475A Plotter COMPAQ 386	<b>Software:</b> Microsoft C 4.0 Microsoft FORTRAN 4.0	
System Users:		
<b>ENVIRONMENTAL NOISE/ECONOMIC DATA SYSTEM</b>		System No.: 071419
<b>Description:</b> Provides a set of airport noise/economic analysis tools on IBM PCs for airport planners and the FAA.	<b>IRMP Information Area:</b>	
	Other	
	Responsible Organization:	AEE-300
	System Owner:	AEE-300
	Software Owner:	AEE-300
	Implementation Date:	10/01/1984
Network:	Annual Operating Costs (\$000):	30.0
<b>Hardware:</b> IBM PC-XT	<b>Software:</b> R:Base 5000 FORTRAN	
System Users:		

<b>AIRPORT NOISE MODELING</b>	
System No.: 071418	
<b>Description:</b> Provides a set of airport noise analysis tools on IBM PCs for airport planners.	<b>IRMP Information Area:</b> <div style="text-align: right;">Other</div>
	Responsible Organization: AEE-120
	System Owner: AEE-120
	Software Owner: AEE-120
	Implementation Date: <b>01/30/1985</b>
<b>Network:</b>	Annual Operating Costa (\$000): 400.0
<b>Hardware:</b> IBM PC-XT HP 7475A Plotter COMPAQ 386	<b>Software:</b> Microsoft C 4.0 Microsoft FORTRAN 4.0
<b>System Users:</b>	
<b>ENVIRONMENTAL NOISE/ECONOMIC DATA SYSTEM</b>	
System No.: 071419	
<b>Description:</b> Provides a set of airport noise/economic analysis tools on IBM PCs for airport planners and the FAA.	<b>IRMP Information Area:</b> <div style="text-align: right;">Other</div>
	Responsible Organization: AEE-300
	System Owner: AEE-300
	Software Owner: AEE-300
	Implementation Date: <b>10/01/1984</b>
<b>Network:</b>	Annual Operating Costa (\$000): 30.0
<b>Hardware:</b> IBM PC-XT	<b>Software:</b> <b>R:Base</b> 5000 FORTRAN
<b>System Users:</b>	

SECURITY	
System No.: 101462	
Description: Provides the means for protecting the files and databases maintained in the AAC-300 equipment system.	IRMP Information Area:
	Other
	Responsible Organization: AAC
	System Owner: AAC
	Software Owner: AAC
	Implementation Date: 12/01/1977
Network:	Annual Operating Costs (\$000): 284.4
Hardware: IBM 3084	Software: ACF2 DITTO IEBGENER Fast Dump RESTORE (FDR) Extended Security System (ESS) NATURAL Security
System Users:	
HARDWARE/SOFTWARE	
System No.: 101466	
Description: Evaluates the code to which any type of hardware or software evaluation is attributed. Processes data for reports to management about capacity planning.	IRMP Information Area:
	Other
	Responsible Organization: AAC
	System Owner: AAC
	Software Owner: AAC
	Implementation Date: 06/01/1973
Network:	Annual Operating Costs (\$000): 920.5
Hardware: IBM 3084	Software:
System Users:	

AIRCRAFT <del>REGISTRATION</del> RECORD ADMINISTRATION SYSTEM (ARRAS)	
System No.: 101461	
<b>Description:</b> Provides record identification, tracking, storage <del>location</del> , and retrieval of the microfiche records <del>main-</del> tained by the FAA Registry for the U.S. civil aircraft fleet.	<b>IRMP</b> Information Area:
	Responsible Organization: <b>AAC</b>
	System Owner: <b>AAC</b>
	Software Owner: <b>AAC</b>
	Implementation Date: <b>03/01/198C</b>
<b>Network:</b>	Annual Operating Costs (\$000): 62.7
<b>Hardware:</b> HP 1000 HP <del>7906/7925</del> Disc Drive HP 2621 P Terminals (4) HP 2621A Terminals (4) HP 2631A Printers,(S) HP 2608AS Printer (1) HP System Console IBM 3084	<b>Software:</b> ACCESS <b>IDCS</b>
<b>System</b> Users:	
<b>AIRCRAFT REGISTRATION SYSTEM</b>	
System No.: <b>101499</b>	
<b>Description:</b> Maintains and processes the registration data of <del>cor-</del> porate and privately-owned aircraft for use by the Aircraft Registration Branch. Provides certificates of registration and aircraft identification numbers of all U.S. civil aircraft.	<b>IRMP</b> Information Area:
	Responsible Organization: <b>AAC</b>
	System Owner: <b>AAC</b>
	Software Owner: <b>AAC</b>
	Implementation Date: <b>03/01/1978</b>
<b>Network:</b>	Annual Operating Costs (\$000): 331.3
<b>Hardware:</b> CODEX CABLE HUX IBM 3084 OS Terminals Four-Phase Terminals Telex 27714 Terminals (2) Telex Printers (2) IBM 3270 Terminals IBM 3179 Terminals (7) IBM 3287 Printer (3)	<b>Software:</b> COBOL-4 COBOL-VS Natural Complete
<b>System</b> Users:	

AIRCRAFT REGISTRATION RECORD ADMINISTRATION SYSTEM (ARRAS)	
System No.: 101461	
<b>Description:</b> Provides record identification, tracking, storage location, and retrieval of the microfiche records maintained by the FAA Registry for the U.S. civil aircraft fleet.	<b>IRMP Information Area:</b> Other
	<b>Responsible Organization:</b> AAC
	<b>System Owner:</b> AAC
	<b>Software Owner:</b> AAC
	<b>Implementation Date:</b> 03/01/198C
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 62.7
<b>Hardware:</b> HP 1000 HP 7906/7925 Disc Drive HP 2621 P Terminals (4) HP 2621A Terminals (4) HP 2631A Printers,(S) HP 2608AS Printer (1) HP System Console IBM 3084	<b>Software:</b> ACCESS IDCS
<b>System Users:</b>	
<b>AIRCRAFT REGISTRATION SYSTEM</b> System No.: 101499	
<b>Description:</b> Maintains and processes the registration data of corporate and privately-owned aircraft for use by the Aircraft Registration Branch. Provides certificates of registration and aircraft identification numbers of all U.S. civil aircraft.	<b>IRMP Information Area:</b> Other
	<b>Responsible Organization:</b> AAC
	<b>System Owner:</b> AAC
	<b>Software Owner:</b> AAC
	<b>Implementation Date:</b> 03/01/1978
<b>Network:</b>	<b>Annual Operating Costs (\$000):</b> 331.3
<b>Hardware:</b> CODEX CABLE HUX IBM 3084 OS Terminals Four-Phase Terminals Telex 27714 Terminals (2) Telex Printers (2) IBM 3270 Terminals IBM 3179 Terminals (7) IBM 3287 Printer (3)	<b>Software:</b> COBOL-4 COBOL-VS Natural Complete
<b>System Users:</b>	

AIR TRAFFIC ELECTRONIC MAIL	
System No.: 201401	
<b>Description:</b> Ties air traffic field facilities with the regional off ice and other field facilities via electronic mail.	<b>IRMP Information Area:</b> <div>Other</div>
	Responsible Organization: AWP-500
	System Owner: AWP-500
	Software Owner: AWP-423
	Implementation Date: 05/01/1987
Network:	Annual Operating Costs (\$000): 2.6
Hardware: DG MV/15000	Software: AOSNS
System Users:	

SECURITY CARD KEY SYSTEM	
System No.: 201402	
<b>Description:</b> Provides management with information about installed RUSCO security card readers, access cards, and personnel assigned card numbers and locations. Supplies the means (interactive terminals) for generating reports and updates.	<b>IRMP Information Area:</b> <div>Other</div>
	Responsible Organization: AWP-491
	System Owner: AWP-423
	Software Owner: AWP-431
	Implementation Date: 05/22/1987
Network: None	Annual Operating Costs (\$000): 0.3
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

AIR TRAFFIC ELECTRONIC MAIL	
System No.: 201401	
Description: Ties air traffic field facilities with the regional off ice and other field facilities via electronic mail.	IRMP Information Area:
	Other
	Responsible Organization: <b>AWP-500</b>
	System Owner: <b>AWP-500</b>
	Software Owner: <b>AWP-423</b>
	Implementation Date: <b>05/01/1987</b>
Network:	Annual Operating Costs (\$000): <b>2.6</b>
Hardware: DG MV/15000	Software: AOSNS
System Users:	

SECURITY CARD KEY SYSTEM	
System No.: 201402	
Description: Provides management with information about in- stalled RUSCO security card readers, access cards, and personnel assigned card numbers and loca- tions. Supplies the means (interactive terminals) for generating reports and updates.	IRMP Information Area:
	Other
	Responsible Organization: <b>AWP-423</b>
	System Owner: <b>AWP-423</b>
	Software Owner: <b>AWP-431</b>
	Implementation Date: <b>05/22/1987</b>
Network: None	Annual <b>Operating Costs</b> (\$000): <b>0.3</b>
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

DIRECTIVES REVALIDATION	
System No.: 201417	
Description: Provides a schedule for revalidating regional directives.	IRMP Information Area:
	Other:
	Responsible Organization: AWP-42
	System Owner: AWP-42
	Software Owner: AWP-43
	Implementation Date: 09/30/1984
Network:	Annual Operating Costs (\$000): 0.1
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	
MAILING ADDRESS LABELS	
System No.: 201418	
Description: Maintains addresses and produces magnetic tapes for processing on Bell & Howell Ink Jet system.	IRMP Information Area:
	Other:
	Responsible Organization: AWP-52
	System Owner: AWP-52
	Software Owner: AWP-43
	Implementation Date: 02/10/1984
Network:	Annual Operating Costs (\$000): 3.5
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

DIRECTIVES REVALIDATION		System No.: 201417
Description: Provides a schedule for revalidating regional directives.	IRMP Information Area:	
	Responsible Organization:	Other: AWP-42
	System Owner:	AWP-42
	Software Owner:	AWP-43
	Implementation Date:	09/30/1984
Network:	Annual Operating Costs (\$000):	0.1
Hardware: DG MV/15000	Software: COBOL ANSI 74	
System Users:		

MAILING ADDRESS LABELS		System No.: 201418
Description: Maintains addresses and produces magnetic tapes for processing on Bell & Howell Ink Jet system.	IRMP Information Area:	
	Responsible Organization:	Other: AWP-52
	System Owner:	AWP-52
	Software Owner:	AWP-43
	Implementation Date:	02/10/1984
Network:	Annual Operating Costs (\$000):	3.5
Hardware: DG MV/15000	Software: COBOL ANSI 74	
System Users:		

REGIONAL WORKLOAD TRACKING - ADMINISTRATIVE HOTLINE	
System No.: 201428	
Description: Tracks hotline actions for the purpose of continual follow-up.	IRMP Information Area:
	Other
	Responsible Organization:
	System Owner:
	Software Owner:
	Implementation Date:
Network:	Annual Operating Costs (\$000):
Hardware: DG MV/15000	Software: COBOL ANSI 74 Present Utility
System Users:	
MANAGEMENT INFORMATION SYSTEM (PRESENT)	
System No.: 201429	
Description: Allows users to selectively access pertinent data from the monthly PMIS string, bi-weekly payroll string, and selected UAS data.	IRMP Information Area:
	Other
	Responsible Organization:
	System Owner:
	Software Owner:
	Implementation Date:
Network:	Annual Operating Costs (\$000):
Hardware: DG MV/15000	Software: COBOL ANSI 74 Present Utility
System Users:	

REGIONAL WORKLOAD TRACKING - ACCOUNTING DOCUMENTS	
System No.: 201430	
Description: Tracks document flow through the Accounting Branch for processing.	<b>IRMP</b> Information Area:
	Other
	Responsible Organization: AWP-42
	System Owner: AWP-42
	Software Owner: AWP-43
	Implementation Date: 11/01/1984
Network: None	Annual Operating Costs (\$000): 51.1
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

TROUBLE REPORTING SYSTEMS	
System No.: 201431	
Description: Provides effective means of recording system hardware trouble status.	<b>IRMP</b> Information Area:
	Other
	Responsible Organization: AWP-43
	System Owner: AWP-43
	Software Owner: AWP-43
	Implementation Date: 06/21/1985
Network:	Annual Operating Costs (\$000):
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

REGIONAL WORKLOAD TRACKING - ACCOUNTING DOCUMENTS	
System No.: 201430	
Description: Tracks document flow through the Accounting Branch for processing.	<b>IRMP</b> Information Area:
	Other
	Responsible Organization: AWP-42
	System Owner: AWP-42
	Software Owner: AWP-43
	Implementation Date: 11/01/1984
Network: None	Annual Operating Costs (\$000): 51.1
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	
TROUBLE REPORTING SYSTEMS	
System No.: 201431	
Description: Provides effective means of recording system hardware trouble status.	<b>IRMP</b> Information Area:
	Other
	Responsible Organization: AWP-43
	System Owner: AWP-43
	Software Owner: AWP-43
	Implementation Date: 06/21/1985
Network:	Annual Operating Costs (\$000):
Hardware: DG MV/15000	Software: COBOL ANSI 74
System Users:	

## 16.13 RECORDS MANAGEMENT INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Resented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
011501	Vacancy Announcement Microfilm Program	56.0	5	2	63
011505	Catalog of FAA Forms	16.0	5	4	63
011506	Catalog of Recurring Reports System	14.7	5	4	63
011507	FAA Microform Catalog	5.0	5	4	63
<b>TOTAL</b>		91.7			

#### FAA Missions Supported:

5 Efficient and economical program administration,

#### FAA Goals Supported:

- 2 Build an FAA culture which **nurtures** achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.
- 4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.

#### FAA N89 Objectives Supported:

##### MANAGEMENT/COMMUNICATION:

- 63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

## 16.13 RECORDS MANAGEMENT INFORMATION AREA

### ONGOING SYSTEMS SUMMARY

Resented below is a list of ongoing information resources systems associated with this information area. The list identifies the FAA agency-level missions, FAA goals, and **FY89** objectives supported by each project. More detailed information may be found in the individual *Fact Sheets* which follow.

### ONGOING SYSTEMS LIST

System Number	System Title	Annual Operating Cost (\$000)	FAA Missions Supported	FAA Goals Supported	FAA Objectives Supported
011501	Vacancy Announcement Microfilm Program	56.0	5	2	63
011505	Catalog of FAA Forms	16.0	5	4	63
011506	Catalog of Recurring Reports System	14.7	5	4	63
011507	FAA Microform Catalog	5.0	5	4	63
<b>TOTAL</b>		01.7			

FAA Missions Supported:

5 Efficient and economical program administration,

FAA Goals Supported:

2 Build an FAA culture which **nurtures** achievement of people's aspirations and provides a management process for realizing individual, as well as organizational objectives.

4 Assure effective and efficient utilization of human, fiscal, material and airspace/airports resources.

FAA N89 Objectives Supported:

**MANAGEMENT/COMMUNICATION:**

63 Implement, through automation, other technology, or procedural changes, programs within each organization that place a special emphasis on reducing the administrative time needed to respond to internal and external requests.

CATALOG OF RECURRING REPORTS SYSTEM	
System No.: 011506	
<b>Description:</b> Maintains a catalog of FAA Headquarters' current internal recurring reports. The catalog lists the RIS number, title, method of collection, OPI, and the preparers and receivers of the report.	<b>IRMP</b> information Area:
	Records Management
	Responsible Organization: AMS-410
	System Owner: AMS-410
	Software Owner: AMS-410
	Implementation Date: 01/21/1986
Network:	Annual Operating Costs (\$000): 14.7
<b>Hardware:</b> Wang VS300	<b>Software:</b> MSI-developed
System Users:	

FAA MICROFORM CATALOG	
System No.: 011507	
<b>Description:</b> Produces a catalog categorizing the microform systems in use throughout the agency. Provides the information needed to identify and locate microfiche publications, aperture cards, 16mm systems within the agency, and commercial sources.	<b>IRMP</b> Information Area:
	Records Management
	Responsible Organization: AMS-410
	System Owner: AMS-410
	Software Owner: AMS-410
	Implementation Date: 10/31/1986
Network:	Annual Operating Costs (\$000): 5.0
<b>Hardware:</b> Wang VS300C	<b>Software:</b> Wang WP
System Users:

## CONTRACTIONS

# Appendix D

## Contractions

**F**AA Order #7340.11, *Contractions*, contains all of the approved contractions and acronyms. The following list defines the contractions and acronyms contained within this document. This selected list is not meant to be a complete FAA compilation.

<del>FAA</del> <b>EAC</b>	Office of Accounting
<b>AAD</b>	Mike Monroney Aeronautical Center
<b>AAF</b>	Office of Associate Administrator for Administration
<del>AAT</del>	Office of Associate Administrator for Airway Facilities
<b>AAL</b>	Office of Accident Investigation
<b>AAM</b>	Alaskan Regional Office
<b>AAP</b>	Office of Aviation Medicine
<del>AAS</del>	Advanced Automation Program <b>Office/Automation</b> Service
<b>AAT</b>	Office of Airport Safety and Standards
<b>ABU</b>	Office of Associate Administrator for Air Traffic
<b>ACCIS</b>	Office of Budget
<b>ACD</b>	The Administrator's Correspondence Control and information System
<b>ACE</b>	Engineering, Research, and Development Service
<b>ACL</b>	Central Regional Off ice
<b>ACM</b>	Office of Research and Technology Applications
<b>ACN</b>	Resource Management Service
<b>ACP</b>	Engineering, Test, and Evaluation Service
<b>ACR</b>	Airport Capacity Planning Off ice
<b>ACS</b>	Office of Civil Rights
<b>ACT</b>	Office of Civil Aviation Security
<b>ADA</b>	Office of Technical Center Director
<b>ADM</b>	Office of Deputy Administrator
<b>ADP</b>	<del>Office of</del> Associate Administrator for Advanced Design and Management Control
<b>ADPE</b>	Automated Data Processing
<b>ADS</b>	Automated Data Processing Equipment
<b>ADTN</b>	Advanced System Design Service
<b>AEA</b>	Administrative Data Transmission Network
<b>AEE</b>	Eastern Regional Off ice
<b>AEU</b>	Office of Environment and Energy
<b>AF</b>	Europe, Africa, and Middle East Office
<del>AFS</del>	Airway Facilities
<b>AFS</b>	Automatic Flight Inspection System
<b>AFSFAC</b>	Flight Standards Service
<b>AFSS</b>	Airway Facilities Sector Facilities System
<b>AGC</b>	Automated Flight Service Station
<b>AGI</b>	Office of the Chief Counsel
	Office of Government and Industry Affairs

AGL	Great Lakes Regional Office
AHD	Office of Human Resource Development
AHR	Office of Associate Administrator for Human Resource Management
AHT	Office of Training and Higher Education
AIA	Office of International Aviation
AIDS	Accident/Incident Data System
AIR	Aircraft Certification Service
<b>AIRTRIPS</b>	Air Traffic Rules Information Processing System
<b>AIS</b>	Aeronautical Information System
ALG	Acquisition and Materiel Service
ALR	Office of Labor and Employee Relations
AMC	Management Control Service
<b>AMIS</b>	Aircraft Management Information System
AMS	Office of Management Systems
AMS-300	Information Resources Management Division
AMS-310	Information Resources Planning Branch
AMT	Administrator's Management Team
AND	Office of Associate Administrator for National Airspace System Development
ANE	New England Regional Office
ANM	Northwest Mountain Regional Office
ANS	National Airspace System Transition Service
AOA	Office of Administrator
AOM	Office of Operations Resource Management
AOP	Office of Operations Planning and Policy
<b>AOR</b>	Operations Research Office
AOV	Office of Aviation Safety Oversight
<b>APA</b>	Office of Public Affairs
APAS	Automated Performance Analysis System
API	Office of Associate Administrator for Policy, Planning, and International Aviation
APN	Office of Personnel
APO	Office of Aviation Policy and Plans
APP	Office of Airport Planning and Programming
APR	Office of Program and Resource Management
<b>APR<sup>1</sup></b>	Agency Procurement Request
APS	Program Engineering Service
ARC	Administrator's Review Committee
ARM	Office of Rulemaking
ARP	Office of Associate Administrator for Airport System Development
ARPRS	Airspace Rules Processing and Reporting System
ARRAS	Aircraft Registration Record Administration System
ARTCC	Air Route Traffic Control Center
ARTS	Automated Radar Terminal System
<b>ASA</b>	Advanced System Acquisition Service
<b>ASAS</b>	Aviation Safety Analysis System
ASE	System Engineering and Program Management Office
ASF	Office of Associate Administrator for Aviation Safety

---

[1] This acronym refers to an official form and should not be confused with the APR office.

AGL	Great Lakes Regional Office
AHD	Office of Human Resource Development
AHR	Office of Associate Administrator for Human Resource Management
AHT	Office of Training and Higher Education
<b>AIA</b>	Office of International Aviation
AIDS	Accident/Incident Data System
AIR	Aircraft Certification Service
<b>AIRTRIPS</b>	Air Traffic Rules Information Processing System
<b>AIS</b>	Aeronautical Information System
ALG	Acquisition and Materiel Service
ALR	Office of Labor and Employee Relations
AMC	Management Control Service
<b>AMIS</b>	Aircraft Management Information System
AMS	Office of Management Systems
AMS-300	Information Resources Management Division
AMS-310	Information Resources Planning Branch
AMT	Administrator's Management Team
AND	Office of Associate Administrator for National Airspace System Development
ANE	New England Regional Office
ANM	Northwest Mountain Regional Office
ANS	National Airspace System Transition Service
AOA	Office of Administrator
AOM	Office of Operations Resource Management
AOP	Office of Operations Planning and Policy
<b>AOR</b>	Operations Research Office
AOV	Office of Aviation Safety Oversight
<b>APA</b>	Office of Public Affairs
APAS	Automated Performance Analysis System
API	Office of Associate Administrator for Policy, Planning, and International Aviation
APN	Office of Personnel
APO	Office of Aviation Policy and Plans
APP	Office of Airport Planning and Programming
APR	Office of Program and Resource Management
<b>APR<sup>1</sup></b>	Agency Procurement Request
APS	Program Engineering Service
ARC	Administrator's Review Committee
ARM	Office of Rulemaking
ARP	Office of Associate Administrator for Airport System Development
ARPRS	Airspace Rules Processing and Reporting System
ARRAS	Aircraft Registration Record Administration System
ARTCC	Air Route Traffic Control Center
ARTS	Automated Radar Terminal System
<b>ASA</b>	Advanced System Acquisition Service
<b>ASAS</b>	Aviation Safety Analysis System
ASE	System Engineering and Program Management Office
ASF	Office of Associate Administrator for Aviation Safety

---

[1] This acronym refers to an official form and should not be confused with the APR office.

DSS	Decision Support System
DTS	Transportation Systems Center
EGATS	Electronically Generated and Transmitted Standard Form 52 (SF-52)
EIS	Enforcement Inspection System
ELAN	Extended Local Area Network
EMRS	Energy Management Reporting System
ESS	Extended Security System
ETAMS	Electronic Time and Attendance Management System
<b>EXIS</b>	Executive Information System
F&E	Facilities and Equipment
FAA	Federal Aviation Administration
<b>FAAMIS</b>	Federal Aviation Administration Management Information System
FACLOC	Facility/Location Validation System
FAR	Federal Aviation Regulation
<b>FC/L</b>	Funding Code/Limitation
FDC	Flight Data Center
FERS	Facilities and Equipment Reporting System
FIFO	Flight Inspection Field Office
<b>FIPS</b>	Federal Information Processing Standards
<b>FIRMR</b>	Federal Information Resource Management Regulation
FMF	Facilities Master File
FMP	Field Maintenance Parties
FOB	Federal Office Building
FS	Flight Standards
<b>FSNFO</b>	Field Standards National Field Office
FTE	Full-Time Equivalent
FTS	Federal Telephone System
FY	Fiscal Year
<b>GAO</b>	Government Accounting Office
GBL	Government Bill of Lading
GC	General Counsel
GPO	Government Printing Office
GRITS	Grass Roots Information Technology System
GSA	General Services Administration
GTR	Government Transportation Request
GWG	Graphics Working Group
HRM	Human Resources Management
HRMD	Human Resources Management Division
<b>IAIS</b>	International Aviation Information System
<b>IAPA</b>	Instrument Approach Procedures Automation
IRM	Information Resources Management
<b>IRMC</b>	Information Resources Management Committee
<b>IRMP</b>	Information Resources Management Plan
<b>IRMS</b>	Information Resources Management System
<b>IRSP</b>	Information Resources System Plan
JAI	Joint Acceptance Inspection
JAR	Joint Aviation Regulation
KSAO	Knowledge, Skills, Abilities, and Other Attributes
LAN	Local Area Network
<b>LS</b>	Logistics and Inventory System
MATES	Modular Applicant Testing, Examining, and Screening

<b>MBO</b>	Management By Objectives
MIS	Management Information System
MLS	Microwave Landing System
MMS	Maintenance Management System
MPP	Merit Provision Program
<b>NADIN</b>	National Data Interchange Network
NAPRS	National Airspace System Performance Reporting System
NAS	National Airspace System
NASA	National Aeronautics and Space Administration
NASMAP	National Airspace System Management Office Automation Program
NASPAC	National Airspace System Performance Analysis Capability
NATS	National Automated Travel System
<b>NAVAIDS</b>	Navigational Aids
NFDC	National Flight Data Center
<b>NFIS</b>	National Facilities Information System
NPDS	National Patch Delivery System
<b>NPIAS</b>	National Plan for Integrated Airports Systems
NTSB	National Transportation Safety Board
OA	Off ice Automation
OAG	Official Airline Guide
OAP	Office Automation Plan
OATS	Office Automation Technology and Services
<b>OE/AAA</b>	Obstruction Evaluation and Airport Airspace Analysis
OMB	Office of Management and Budget
<b>OMIS</b>	Operational Management Information System
<b>OPI</b>	Office of Primary Interest
OPM	Office of Personnel Management
OPR	Office of Primary Responsibility
OPRAS	Air Traffic Operational Planning Requirements Analysis System
<b>OPS</b>	Operations
<b>OS</b>	Operating System
OST	Office of the Secretary, Department of Transportation
<b>OWCP</b>	Office of Workman's Compensation Programs
PAS	Performance Appraisal System
PC	Personal Computer
PCS	Permanent Change of Station
PD	Position Description
PDN	Public Data Network
PETS	Personnel Employment Tracking System
PFF	<del>Precommissioned</del> Facilities File
PIP	Program Implementation Plan
PM	Preventative Maintenance
<b>PMIS</b>	Personnel Management Information System
PMS	Program Management System
<b>PPIMS</b>	Personal Property-In-Use Management System
PRA	Paperwork Reduction Act of 1980
QA	Quality Assurance
QUASAR	Quality Assurance Analysis Reporting
R&D	Research and Development
<b>RE&amp;D</b>	Research, Engineering, and Development

<b>MBO</b>	Management By Objectives
MIS	Management Information System
MLS	Microwave Landing System
MMS	Maintenance Management System
MPP	Merit Provision Program
<b>NADIN</b>	National Data Interchange Network
NAPRS	National Airspace System Performance Reporting System
NAS	National Airspace System
NASA	National Aeronautics and Space Administration
NASMAP	National Airspace System Management Office Automation Program
NASPAC	National Airspace System Performance Analysis Capability
NATS	National Automated Travel System
<b>NAVAIDS</b>	Navigational Aids
